
Twenty-Year Materials Recovery And Resource Management Plan For McLean County, Bloomington, and Normal, Illinois

Prepared by the Ecology Action Center

December 27, 2017

Michael Brown, **Executive Director**

Larissa Armstrong, **Program Coordinator**

Lacey Monterastelli, **Program Coordinator**

Dr. Tom Bierma, **Technical Advisor**

Becky Fiedler, **Solid Waste Intern**

Seth Rients, **Solid Waste Technician**

ECOLOGY ACTION CENTER

Local approval:

McLean County Board: January 16, 2018

Normal Town Council: February 5, 2018

Bloomington City Council: February 26, 2018

i. Acknowledgments

I would like to thank the dozens of individuals representing numerous institutions, recyclers, waste haulers, nonprofit organizations, government agencies, and businesses that assisted with this plan (see Appendix A., on page 26 for a full list of focus group and stakeholder group members). I knew initiating the project to reboot our waste management efforts was an ambitious undertaking. Now, nearly two years later, I feel we have all benefited from the process of exploring all of the existing problems and barriers, and brainstorming some creative solutions for the future. I am excited to see the support for this truly bold new plan to better address our local waste management needs.

Special thanks go to the City of Bloomington, Town of Normal, and McLean County staff, for their encouragement and patience as we opted to start from scratch to create an entirely new 20-year waste plan rather than merely meet the statutory requirements for a five-year update to the existing McLean County Integrated Solid Waste Management Plan. The significant change in circumstances from 1992, effectively mandates a meaningful change in our waste management approach in McLean County and I am grateful that our partners in this effort recognize the need and take this challenge seriously.

I am grateful to the EAC staff who have contributed to this process and those who have assisted in covering other roles as increasingly more staff time was redirected to develop this plan.

My biggest thanks go to our three-person advisory committee who were a key part of the entire process and helped guide us through different challenges and progressing stages of the project. I need to thank the recently retired Dr. Tom Bierma of Illinois State University's Environmental Health program in particular. Dr. Bierma was invaluable to the process. He loaned his expertise and insight gained over the course of his career and dedicated a significant amount of time conducting research and interviews to benefit the development of this new plan.

Michael Brown
McLean County Solid Waste Coordinator

ii. Table of Contents

iii. Executive Summary

The McLean County Integrated Solid Waste Management Plan was adopted in 1992; it was updated four times over the twenty years that followed, consistent with the requirements of the Illinois Solid Waste Planning and Recycling Act. As the time approached to begin work on the 2017 5-year update, it became apparent that a short-term update would insufficiently meet the contemporary needs of the Bloomington-Normal and McLean County area.

The impending closure of the McLean County Landfill, significant changes in recycling and waste technologies, and a stagnating community-wide recycling rate are all variables contributing to the need for an entirely new 20-year solid waste plan instead of a short-term update.

The Ecology Action Center, as the designated solid waste agency for McLean County, Bloomington, and Normal, coordinated the two-year process to create a new solid waste plan and will be responsible for it's implementation. EAC staff created focus groups representing waste haulers, recyclers, institutions, local governments, businesses, and other entities to explore the known challenges facing solid waste management currently, anticipate future challenges, and brainstorm solutions.

Top Six New Waste Management Priorities:

1. Commercial recycling
2. Construction and Demolition recycling
3. Multifamily recycling
4. Food waste recycling
5. Permanent Household Hazardous Waste Facility
6. Increased outreach and technical assistance

The result is an assertive plan with a strong emphasis on addressing existing gaps in recycling and waste services in McLean County and prioritizing six core strategies that will have the greatest impact on reducing waste and increasing recycling. Implementation should be managed to achieve the maximum net positive economic impact. This may mean the most cost-effective option, or in the best-case scenario, the option that creates revenue and funding opportunities, either to support waste programs or encourage development of local or regional recycling industry.

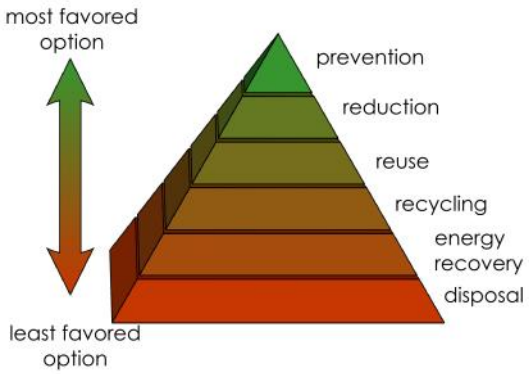

FIGURE 1: THE SOLID WASTE MANAGEMENT HIERARCHY

A strong adherence to the solid waste hierarchy, prioritizing the highest value use of materials over lowest value use is inherent in this new plan. The hierarchy starts with waste prevention, the most beneficial, followed by waste reduction, reuse, recycling (including composting as a process for recycling of organic materials), energy recovery processes (which includes the spectrum of waste-to-energy processes ranging from anaerobic digesters through incineration), and finally ends with disposal in a landfill, which has no specific environmental or economic growth benefit.

iv. Action Plan

QUARTER 1: 2017-2022

- Increase McLean County Recycling Rate Goal to 50%.
- Implement C & D Recycling Ordinance.
- In addition to existing solid waste staff at EAC, provide funding for a full-time solid waste technician for business waste consultations, negotiations of non-exclusive franchise waste/recycling agreements, to identify barriers and solutions to recycling in older neighborhoods/areas with limited space, and to conduct additional research and outreach.
- Determine if a voluntary program (e.g. geographic based non-exclusive franchise agreement for waste and recycling) for multi-family housing recycling is feasible in lieu of an ordinance. If so, implement a pilot program to verify feasibility. If not, propose an ordinance to achieve the recycling goal.
- Determine if a voluntary program (e.g. geographic based non-exclusive franchise agreement for waste and recycling) for commercial recycling is feasible in lieu of an ordinance. If so, implement a pilot program to verify feasibility. If not, propose an ordinance to achieve the recycling goal.
- Work with community partners to transition to a new food waste processing facility and/or help attract a new service provider to develop a new local facility.
- Institute regular meetings of an informal solid waste coalition of service providers and other relevant parties.
- Initiate feasibility study for permanent Household Hazardous Waste facility for McLean County.
- Work with the McLean County Wellness Coalition and other partners to expand food rescue in the community.

QUARTER 2: 2022-2027

- Increase McLean County Recycling Rate Goal to 60%.
- Assuming successful commercial recycling pilot program, develop voluntary program and expand to 25% of businesses in the community.
- Assuming successful apartment recycling pilot program, develop voluntary program and expand to 50% of multi-family housing in the community.

- Initiate process to establish permanent Household Hazardous Waste Collection Facility in McLean County or if suitable downstate HHW facility is already established nearby, utilize facility at disposal site for frequent and regular one-day McLean County collection events.
- Determine if a voluntary program for commercial food waste recycling is feasible in lieu of an ordinance. If so, implement a pilot program to verify feasibility. If not, propose an ordinance with phased-in implementation; set initial goal at 25% of the commercial food waste volume.

QUARTER 3: 2027-2032

- Increase McLean County Recycling Rate Goal to 70%
- Increase coverage of voluntary commercial recycling program to 50% of businesses OR increase coverage of commercial recycling ordinance to include 75% of businesses.
- Increase voluntary apartment recycling program to 75% in Bloomington-Normal OR increase mandatory multi-family housing recycling to include all units not otherwise covered by existing municipal services.
- Expand coverage of commercial food waste composting program to include 50% of commercial food waste volume.
- Offer public drop-off facility for residential food waste composting.
- Initiate feasibility study into anaerobic digester technology (or other equivalent low-temperature waste to energy technology) as additional option for food waste composting program for more beneficial by-products from food waste.

QUARTER 4: 2032-2037

- Increase McLean County Recycling Rate Goal to 80%
- Increase coverage of voluntary commercial recycling program to 75% of businesses OR increase coverage of commercial recycling ordinance to include 100% of businesses.
- Increase voluntary apartment recycling program to include 100% of multi-family housing in Bloomington-normal.
- Expand coverage of commercial food waste composting program to include 75% of commercial food waste volume.
- Contingent upon positive study results, add anaerobic digester technology to food waste recycling program.

Section 1. Introduction

McLean County's only remaining landfill will close in 2018. A reliable source of revenue that has long funded solid waste planning and outreach efforts will disappear with that closure. Coupled with issues such as stagnating recycling rates, fluctuating commodity prices, and problematic waste management issues such as e-waste and household hazardous waste, municipal solid waste disposal faces numerous challenges in the Bloomington-Normal and McLean County area in the coming years. However, over four decades of successful local waste programs with strong participation rates indicate a positive environment for further improvement in the short and long term.

McLean County currently landfills over 150,000 tons of materials per year. Most of this material is recoverable, and has significant potential environmental and economic benefits. The imminent closure of the County's only remaining landfill offers an opportunity to make dramatic improvements in waste materials management programs, creating new jobs and other economic opportunities while avoiding transporting and disposing of these materials outside the County.

The original McLean County Integrated Solid Waste Management Plan was approved in 1992, with five-year updates approved in 1997, 2002, 2007, and 2012. The next five-year update was due in 2017, but significant changes in the waste management landscape since 1992 led the McLean County Solid Waste Technical Committee to unanimously support the creation of a new 20-year solid waste plan. A new plan, in contrast to another five-year update, allows for a fresh start, taking the improvements in recycling strategies and systems, fluctuations in commodity markets, contemporary perspectives and behaviors by residents on waste issues, and new and emerging technologies for more efficient waste management into consideration.

Upon review, approval, and adoption consistent with the Illinois Solid Waste Planning and Recycling Act, this document replaces the 1992 McLean County Integrated Solid Waste Management Plan as the guiding document for solid waste management in McLean County, the City of Bloomington, and Town of Normal.

Section 2. Mission Statement

The County of McLean, City of Bloomington, Town of Normal, McLean County Regional Planning Commission, and the Ecology Action Center, in order to manage municipal solid waste in a responsible and cost-effective manner seek to develop a 20-year progressive plan for waste reduction, recycling, composting, and disposal.

Section 3. Resource Management Plan Goals

The McLean County Solid Waste Technical Committee developed and approved the following goals for the 2017 McLean County Recovery and Resource Management Plan at its meeting on November 3, 2015.

Goal 1: Significantly reduce the amount of solid waste requiring disposal through increasing source reduction, reusing, recycling, and composting
Goal 2: Manage the remaining solid waste disposal in an efficient, equitable, and environmentally protective manner, consistent with the solid waste hierarchy
Goal 3: Adopt secure, long-term funding mechanisms that provide sufficient revenue for all local waste program needs while providing incentives for increased waste reduction and diversion

Section 4. Current Waste Management Situation

A. Landfill Capacity

ADS/McLean County Landfill #2, located on the west side of Bloomington just outside city limits, is privately owned by American Disposal Services of Illinois, Inc., a subsidiary of Republic Services.[1] It was opened in 1990 and in 2008 was permitted for a lateral expansion. The total permitted landfill area is 55 acres with a design capacity of 3,994,000 cubic yards.

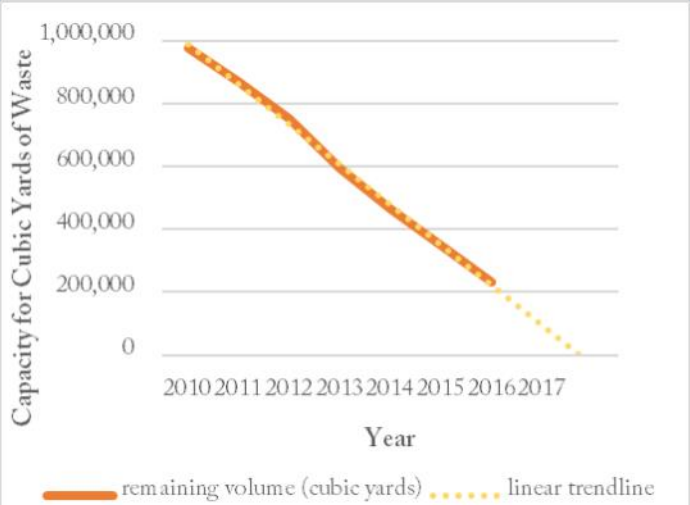

FIGURE 2: MCLEAN COUNTY LANDFILL CAPACITY

According to the January 1, 2017 assessment[2], only 174,992 cubic yards of capacity remain. The McLean County Landfill is expected to begin closure procedures around March of 2018. The declining capacity has been monitored for several years and is one of the original factors driving the decision to create a new twenty-year solid waste plan.

Most McLean County waste that is not diverted is landfilled at the ADS/McLean County Landfill #2. Per data collected for the Ecology Action Center's calculation of the 2016 waste generation rate and recycling rate for McLean County[3], 185,487 tons or 96.4% was landfilled at the McLean County Landfill, while 7,009 tons or 3.6% was disposed of at the Area Disposal Company Clinton Landfill.

The vast majority of waste that is ultimately landfilled in McLean County is generated in the urban area—the twin cities of Bloomington and Normal. Of the 192,496 tons of waste landfilled in 2016, an estimated 44% or 84,685 tons was generated in Bloomington, 31% or 59,299 tons in Normal, with only 25% or 48,512 tons generated in the rest of McLean County.

Bloomington and Normal have a joint contract with Republic Services/Allied Waste for disposal of municipal solid waste collected, by City of Bloomington and Town of Normal waste trucks respectively. While the McLean County Landfill is anticipated to reach capacity in less than a year, the current waste contract between Republic/Allied and the two municipalities automatically renews each year through March 1, 2020 (unless one of the parties opts out with

1. While Republic Services is the name most commonly used, we use the names ADS, American Disposal Services, Republic Services, and Allied Waste interchangeably to refer to Republic Services. Use of the alternate names is usually relative to a reference to primary source documents where an alternate name/subsidiary name might be in use.
2. See Appendix C.
3. See Appendix F.
4. See Appendix D.

90 days notice) with expiration on February 28, 2021.[4] In fact, the waste contract itself is not dependent upon the McLean County Landfill; as it stands currently, local waste may be deposited at the McLean County Landfill or it might sometimes be transported the Pontiac Landfill, in Livingston County, also owned and operated by Republic Services/Allied Waste. If the current waste contract extends beyond the life of the McLean County Landfill, Republic Services will simply begin to transport all of the Bloomington and Normal waste from the transfer station at the McLean County Landfill to Livingston County.

McLean County also has an agreement with the landfill; the 2004 Host County Agreement between American Disposal Services of Illinois (ADS)[5] and the County of McLean, Illinois provides for a Host Benefit Fee which "…shall be $15,000.00 per month or $2.54 per ton of Nonhazardous Solid Waste disposed of at the Landfill or Expanded Landfill per month, whichever is greater. Such payments shall conclude on such date that ADS or its successor/ assignee permanently ceases the acceptance of Nonhazardous Solid Waste at the Landfill or Expanded Landfill, whichever date is later."

This agreement also requires ground water monitoring by ADS semi-annually as long as the landfill remains in operation and until thirty years after the Illinois EPA certifies the closure of the landfill. Groundwater samples indicating possible contamination will require repeat testing; evidence of a contaminated well will require that ADS provides an alternate potable water supply to that property owner which could include a new well. The agreement also requires that ADS maintain an environmental pollution liability insurance policy. The host agreement expires thirty years after the closing of the landfill.

B. Stagnating Recycling Rates

The EAC annually calculates the amount of total waste generated and what percentage of that waste was recycled to measure progress towards a general waste reduction and increased recycling goal. McLean County raised the recycling rate goal from 25% to 40% as part of the 2002 five-year update to the 1992 McLean County integrated Solid Waste Management Plan after reaching the initial 25% target.

Since 2002, the annual community-wide recycling rates gradually increased overall but did not meet the 40% until 2016. Ten years of stagnating recycling rates despite ongoing improvements in local recycling programs was finally changed by the introduction of a more significant initiative. In April 2016, both the City of Bloomington and the Town of Normal begin sending "bulky" curbside waste, meaning furniture, remodeling materials, shingles, and similar larger trash items, to the local construction and demolition recycling facility instead of the landfill. With even less than a full year of implementation, this new strategy had a significant impact on the overall recycling rate, pushing it beyond 40% for the first time ever.

5. See Appendix B.

year	total MSW recycled	total MSW landfilled	total MSW generated	change from previous	total recycling rate
2005	68,182	153,884	222,066	*-5.6%*	30.7%
2006	75,959	159,396	235,355	*6.0%*	32.3%
2007	93,065	164,101	257,166	*9.3%*	36.2%
2008	98,220	163,202	261,422	*1.7%*	37.6%
2009	80,202	148,089	228,291	*-12.7%*	35.1%
2010	80,515	134,325	214,840	*-5.9%*	37.5%
2011	71,099	136,927	208,026	*-3.2%*	34.2%
2012	66,737	116,342	183,079	*-12.0%*	36.5%
2013	73,833	121,991	195,824	*7.0%*	37.7%
2014	85,196	141,068	226,264	*15.5%*	37.7%
2015	92,585	159,083	251,668	*11.2%*	36.8%
2016	73,760	103,459	177,219	-29.6%	41.6%

TABLE 1: MCLEAN COUNTY WASTE GENERATION AND RECYCLING RATES 2005-2016

The significant impact of this single strategy greatly emphasizes that while recycling options and services in McLean County and Bloomington-Normal are extensive and often better that what is found in many other Illinois communities, to make meaningful progress toward reaching and exceeding the current and future recycling rates goals, a much more strategic and holistic approach is necessary.

C. Numerous and Diverse Recycling and Waste Services

Bloomington-Normal and McLean County boast a wide variety of recycling and waste options for residents and businesses with services offered by public sector and private sector entities in addition to multiple successful public-private partnerships.

The charts that follow outline services available.

TABLE 2: CURRENT RECYCLING PROGRAMS AND FACILITIES

Program	Waste Stream	Public or private	Location/comments
Residential curbside single stream recycling collection	Mixed materials - paper, cardboard, cans, bottles, most plastic containers, etc.	Public	Town of Normal ***65% participation rate as of April 2017; many Normal residents use drop-off program instead***
Residential curbside single stream recycling collection	Mixed materials - paper, cardboard, cans, bottles, most plastic	Public	City of Bloomington ***80% participation rate as of June 2017***
Residential recycling drop-off program	Mixed materials - paper, cardboard, cans, bottles, most plastic	Public	Six locations in the Town of Normal
E-waste recycling	All CEDs, EEDs, including CRTs	Public	Town of Normal Public Works **2016: 419 tons recycled**
E-waste recycling	Most CEDs and EEDs, excluding CRTs	Private	Home Sweet Home Ministries Mission Mart
E-waste recycling	Most CEDs and EEDs, excluding CRTs	Private	Habitat For Humanity ReStore
E-waste recycling	Most CEDs and EEDs, excluding CRTs	Private	BestBuy
E-waste recycling	Most CEDs and EEDs, excluding CRTs	Private	Goodwill Industries
E-waste recycling	Most CEDs and EEDs, excluding CRTs	Private	Henson Disposal
Textile recycling	Clothing, sheets, towels, etc.	Private	Home Sweet Home Ministries Mission Mart
Food scrap composting program	Commercial and institutional food waste	Private-public	Midwest Fiber hauls to Better Earth Compost in Bartonville
Pharmaceutical disposal	Prescription and non-prescription drugs	Private-public	OSF Eastland Pharmacy, Advocate-BroMenn Atrium Pharmacy, Chenoa
Pharmaceutical disposal including controlled substances	Prescription and non-prescription drugs including controlled substances	Public	Town of Normal Police Department, City of Bloomington Police Department, McLean County Sheriff's Department, ISU
Mattress recycling	Mattresses and box springs	Private	Kern Mattress Outlet
Plastic bag/film Recycling	Plastic grocery bags, newspaper sleeves, dry cleaning bags, electronic wrap, plastic cereal box liners, Tyvek shipping envelopes, bubble wrap, product wrap from paper towels or toilet paper	Private	Most grocery stores
TerraCycle recycling	Nontraditional items	Private	Various locations
Eyeglass recycling	Used eyeglasses	Private	Lion's Club
Hearing aid recycling	Used hearing aids	Private	Lion's Club
Household Hazardous Waste collection	Thousands of residentially generated household hazardous waste items	Public-private	Ecology Action Center
Construction and demolition recycling	Shingles, wood, drywall and plaster, metals, cardboard & paper, aggregate materials, glass, vinyl siding, bulk and clear plastic	Private	Henson Disposal C & D Recycling Facility
Scrap metal	Iron, aluminum, all other metals	Private	Behr Metals
Appliances	White goods	Public or	Municipalities or private haulers
Brush and/or yard waste	Wood yard waste or vegetation	Public	Municipalities
Mercury thermostats	Mercury containing thermostats	Public	Normal Public Works
Fluorescent bulbs	CFL or tube fluorescent	Private	Box hardware stores, Batteries Plus Bulbs
Non rechargeable batteries	Watch batteries through AAA, C, D, 9V, etc.	Private	Interstate Batteries and Batteries Plus Bulbs[6]

TABLE 3: RURAL MCLEAN COUNTY MUNICIPAL RECYCLING PROGRAMS

Village/Town	Recycling Program Type	Materials Accepted	Special Recycling
City of Chenoa	Curbside	Single stream	Electronics collection bin
City of LeRoy	Curbside	Single stream	
City of Lexington	Curbside	Single stream	
Village of Arrowsmith	Curbside		
Village of Bellflower	Drop-off	Metals, paper	
Village of Carlock	Curbside	Single stream	
Village of Colfax	Curbside	Single stream	
Village of Cooksville	Curbside	Single stream	
Village of Danvers	Drop-off		
Village of Downs	Curbside	Single stream	
Village of Ellsworth	Curbside	Single stream	
Village of Gridley	Curbside	Single stream	
Village of Heyworth	Curbside	Plastics, cardboard, newsprint	Electronics drop-off twice a month
Village of Hudson	Curbside	Single stream	
Village of McLean	Curbside	Single stream	
Village of Towanda	Drop-off with some curbside areas	Single stream	

D. Recycling and Waste Education and Outreach

As the solid waste agency for Bloomington, Normal, and McLean County, the EAC provides a number of services intended to increase participation in local recycling and waste reduction. Table 4 briefly lists some of the core education and outreach efforts under the "McLean County Solid Waste Program". For a more detailed listing, please consult Appendix E, the *2016 Solid Waste Program Report*.

TABLE 4: RECYCLING EDUCATION AND OUTREACH

Program	Target Audience	Location	Comments
Youth classroom waste and recycling education	Fourth grade	McLean County	Nearly universal reach, visits to virtually every fourth grade classroom
Youth waste and recycling education	Young library visitors	McLean County	
Public recycling and waste presentations and information booths at public events/health fairs	Community groups, service organizations scouts, college classes	McLean County	
Social media outreach	Adults of all ages	McLean County	Nearly 75,000 interactions in 2016, well over twice the EAC's goal
Traditional media outreach and newsletters	Adults	McLean County	Paid promotions or feature stories; both help raise awareness of issues
Recycling information center	All sectors	McLean County	Community-wide information center on recycling and waste issues, answering phone, in-person, or email inquiries
Online recycling and waste directory	All sectors	McLean County	Extensive and heavily used online recycling listings for all public programs and many private or nonprofit programs. Over 35,027 visits to these pages in 2016.
Composting workshops	Homeowners	McLean County	Hands-on build-your-own composter workshops with in-depth instruction on composting.
Recycle Coach	Residential	McLean County, with heavy Bloomington-Normal urban focus	User-friendly, browser based and smart phone application, geographic-based comprehensive information, Spanish language enabled

E. Current Waste Composition and Disposition

In 2015, the Illinois Department of Commerce and Economic Opportunity published a report detailing the composition of municipal solid waste for each county in the state. We combined the *Illinois Commodity/Waste Generation and Characterization Study Update* data for McLean County with data collected locally by the Ecology Action Center through annual residential waste audits and the annual calculation of waste generation and recycling rates. Through this analysis, we have a very thorough understanding of the precise composition of waste generated in McLean County and what portion of that waste is landfilled versus recycled.

The following charts illustrate this breakdown and directly point to the waste streams where there remains the most significant room for improvement in waste recovery.

FIGURE 3: 2014 MCLEAN COUNTY WASTE DISPOSITION

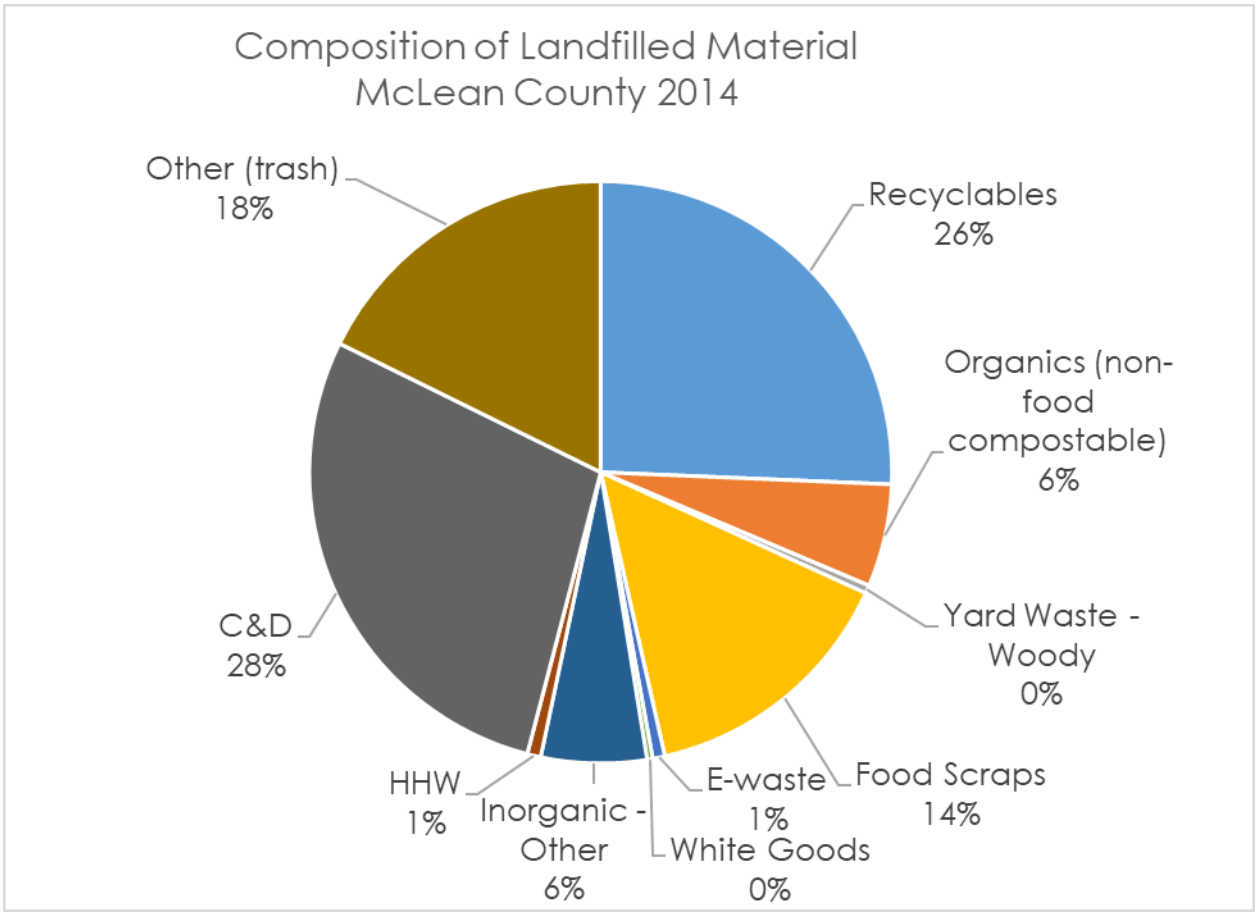

TABLE 5: 2014 MCLEAN COUNTY WASTE DISPOSITION

Material	Generation	Recovery	Recovery (%)	Disposal/Landfilled
Recyclables	82,830	36,323	43.9%	46,507
Organics (non-food	16,550	6,215	37.6%	10,335
Yard Waste - Woody	2,020	1,202	59.5%	818
Food Scraps	29,410	2,875	9.8%	26,535
E-waste	2,600	1,369	52.7%	1,231
White Goods	2,910	2,342	80.5%	568
Inorganic -	18,700	8,094	43.3%	10,606
HHW	4,310	2,946	68.4%	1,364
C&D	53,500	2,345	4.4%[7]	51,155
Other (trash)	35,970	3,888	10.8%	32,082
TOTAL	**248,800**	**67,599**	27.2%	**181,201**

(Source: Illinois DCEO Waste Characterization Study with additions from Ecology Action Center's 2014 Waste Generation and Recycling Rate Study)

F. Identified Service Gaps and Problem Areas

As shown in Table 5, McLean County Waste Disposition, there are multiple waste streams with significant potential for greater recovery. In Table 6, Waste Issues, we briefly explore some of the issues related to these deficient recovery rates and/or identify other known problematic waste issues that are not revealed through the waste disposition chart.

7. C & D materials recovery is now estimated to be as high as 21% as of 2016, following the move by the City of Bloomington and Town of Normal to send curbside "bulky" waste to Henson Disposal C & D Recycling.

TABLE 6: WASTE ISSUES

Problem/Services Gap	Waste stream	Location	Comments
Multifamily housing recycling	Traditional recyclables	Most locations	Curbside recycling services are only offered to single family homes in most areas
Commercial recycling	Traditional recyclables	Most locations	Perceived or real barriers to recycling remain an issue for many businesses or business districts
Organics/food scrap recycling	Organics	Most locations	Small scale/backyard composting has low participation rates, most residents or businesses perceive too many obstacles
Household hazardous waste	HHW	McLean County	Locally funded biennial HHW collection has reduced barriers to participation. However a permanent facility is needed to properly meet local and regional needs.
Freon/coolant containing items	Dehumidifiers, air conditioners, refrigerators	All locations except Bloomington and Normal single-family housing	Coolant containing items are often not cost-effective for the private sector to manage due to the low prices for metals but high costs of removing and disposing of coolant.
Carpet recycling	Carpeting	McLean County	Carpeting is a difficult material to recycle including sorting it from C & D materials without contaminating it in addition to the cost of shipping it to a market.
End of school year student move out	Furniture, clothing, e-waste, household goods	Normal around Illinois State University	Massive volumes of usable materials are discarded by students at the end of the system; small scale efforts to address this issue have had minimal impact.
Construction and demolition recycling	All construction materials – wood, metals, aggregate, drywall, vinyl siding	McLean County	Under-utilized C & D recycling options – less than 5% of C & D waste is currently recovered despite being a cost-effective
E-waste	Consumer electronics	McLean County	Few collection points, especially for costly items such as CRT monitors/tvs, collection points only located in Bloomington-Normal, unreliable system sometimes results in significant local costs for compliance with Illinois ban on electronics from landfills

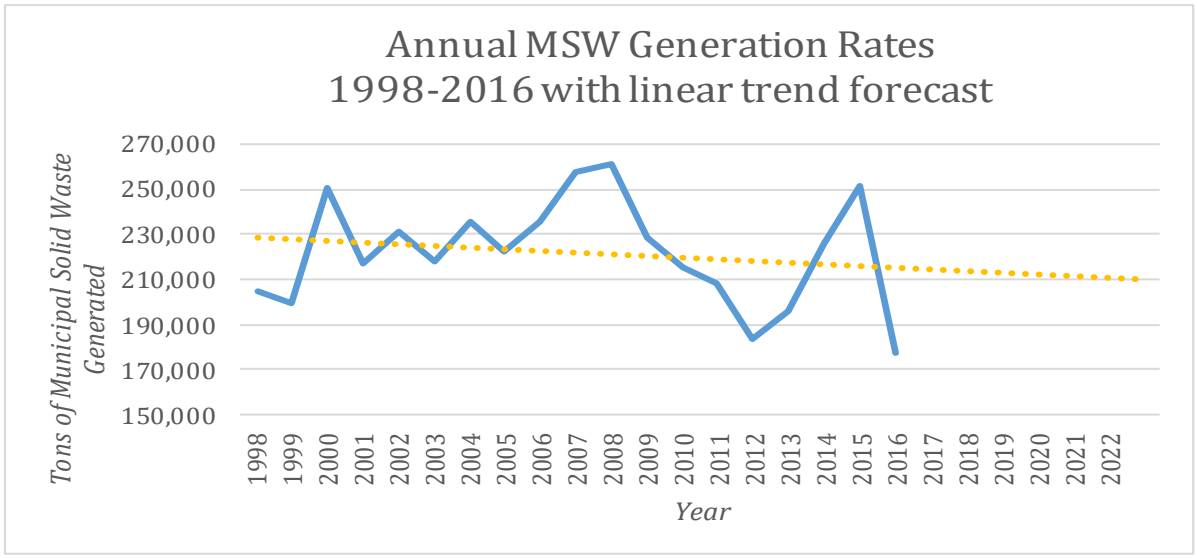
Section 5. The Next Twenty Years

A. Waste Composition Outlook

Over the next twenty years, total waste generation rates are projected to gradually decrease. Figure 4 plots annual municipal solid waste generation rates from 1998 through 2016 with a trend line forecasting the next five years. The existing trend based on local waste generation data indicates an approximate decrease of 6.11% over 18 years, or a rate of decrease of .34% per year.

The McLean County MSW composition is not expected to significantly change over the course of this solid waste plan. One waste stream with potential to change is dependent upon the success of growing commercial food waste composting initiatives. The establishment of a local composting facility that allows for more cost-effective food-waste services to be offered to food service operations and large institutions could help drive these entities away from what are often non-recyclable single-service containers and utensils towards instead fully compostable packaging that would be collected and recycled together with food scraps. The rate of this transition would likely be relative to the rate of adoption of these services by new commercial and institutional customers.

FIGURE 4: MUNCIPAL SOLID WASTE GENERATION PROJECTION



B. Proposed New Waste Strategies

Six key strategies are the primary focus of the proposed 2017 Materials Recovery and Resource management Plan based on the challenges and system deficiencies identified in the tables above. These strategies each have strong potential for significant impact on waste recovery.

There are assumed costs within these proposed strategies, but there are also potential efficiency gains and other cost savings, private or private-public economic development opportunities, revenue potential, and possible alternative revenue sources. In the long term, cost avoidance will be key as fuel and labor costs for exporting waste to externally located landfills will eventually increase due to external economic forces, even if not in the short term. [8]

Given the anticipated loss of host fees with the impending closure of the McLean County Landfill, exploring alternate revenue sources to help support waste recovery programs would be beneficial to the long term sustainability of new services. Traditional funding such as host fees can be counter-productive as they have an inverse correlation to successful programs; the more waste recovery that occurs in a community with a landfill, the less funding is made available for waste recovery programs. Instead, and in the absence of a landfill or other Pollution Control Facility with a host agreement, voluntary waste fees that are directly correlated with recovery programs would increase funding for further waste recovery with increasing success.

The establishment of additional waste transfer stations could have multiple economic benefits including increased competition therefore more beneficial waste disposal rates or the possibility of new host agreements providing host fees as a new revenue source.

8. Republic Services officials have indicated that a shift to Livingston County Landfill will not result in cost increases due to economies of scale possible at that site that are not available at the McLean County Landfill.

TABLE 7: EVALUATION OF PROPOSED WASTE/RECYCLING PROGRAMS

Proposed program/ facility	Waste stream	Evaluation - Advantages/Disadvantages				Implementation time schedule	Proposed Location
		Environmental	*Energy*	*Life Cycle Cost*	*Economic*		
Multi-family recycling initiative	Traditional recyclables	Positive – more resources conserved	Neutral – increased local fuel use to collect more materials but decreased fuel use to export less to out-	Increased recovery benefits should outweigh program costs	Fluctuating commodity values can help or hinder. Long term, this program's costs should be more cost effective than landfilling.	Launch pilot program within five years (by 2022). Expand to 50% community coverage by 2027. Increase coverage by 25% by 2032 and 2037.	N/A
Commercial recycling initiative	Traditional recyclables	Positive – more resources conserved	Neutral – increased local fuel use to collect more materials but decreased fuel use to export less to out-	Increased recovery benefits should outweigh program costs	Fluctuating commodity values can help or hinder. Long term, the costs of this program should be more cost effective than landfilling.	Launch pilot program within five years (by 2022). Expand to 25% community coverage by 2027. Increase coverage by 25% by 2032 and 2037.	N/A
C & D recycling initiative	Construction and demolition materials	Positive – more resources conserved	Neutral – increased local fuel use to collect more materials but decreased fuel use to export less to out-	Increased recovery benefits should outweigh program costs	Fluctuating commodity values can help or hinder. Long term, the costs of this program should be more cost effective than landfilling.	Implement C & D recycling ordinance within one year of adoption of solid waste plan	Existing facilities or source separate on-site
Organics/ food waste recycling initiative	Food scraps and other organic materials	Positive – more resources conserved and less methane emissions from anaerobic organic breakdown in landfill.	Neutral – increased local fuel use to collect food scraps for composting but decreased fuel use to export less to out-of-county landfills.	Increased recovery benefits should outweigh program costs	After initial capital investment, there eventually should be positive economic benefits especially from secondary products of compost and possibly energy generation.	By 2022: work with community partners to reduce food waste. Attract a new food scrap recycling facility to McLean County. By 2027: Evaluate voluntary program vs. ordinance, start with goal to include 25% of waste stream. By 2032: expand coverage to 50% of waste stream and offer public residential drop-off. Expand to 75% of waste stream and investigate anaerobic digester technology for incorporation by 2037.	TBD
HHW Permanent Facility	Household hazardous waste materials	Very positive – reduction of hazardous materials disposed of improperly.	Net negative— Some positive in that some materials are fuel blended, but net impact is likely negative due to large costs to transport and dispose of most HHW.	Increased recovery benefits should outweigh program costs	Significant costs to run a permanent facility, but options to offset these costs include: collaborating with the IEPA to offer a public facility open to any Illinois residents or offer commercial materials disposal at a fee in order to offset the HHW costs. HHW facility can be significant regional draw, making it an economic development tool.	Feasibility study by 2022, launch process by 2027. Open facility by 2032.	TBD
Increased outreach and technical assistance	Administration, coordination, facilitation	Very positive – more time resources needed for success of above	No significant impact	Net positive	Increased recovery benefits and economic development should outweigh increased personnel costs	Increase personnel budget to allow for full time solid waste program technician in addition to existing solid waste staff.	Existing solid waste agency - EAC

Multi-Family Housing Recycling

Single family households served by automated curbside single stream recycling see a high rate of participation in both Bloomington and Normal, but apartment buildings and other multi-family housing represent a significant gap in recycling services. Implementing a new program to address this deficiency may be possible as a voluntary program with assistance from the EAC or as an ordinance mandated jointly by both Bloomington and Normal.

Feedback from stakeholder groups indicated that an ordinance approach would have the benefit of "leveling the playing field" for all rental companies so any additional costs would not be disproportionately applied. Additionally, whether through a voluntary program or an ordinance, additional cost savings may be realized through a non-exclusive franchise agreement system, where the EAC identifies geographically dense routes and negotiates the best price for combined waste and recycling services for multi-family housing units in the bid area.

Commercial Recycling

According to the 2015 Illinois Waste Characterization Study by Illinois DCEO, institutional, commercial, and industrial waste make up almost 43% of waste landfilled in Illinois; 48.6% of that may be recoverable.

Implementing a new program to address this deficiency may be possible as a voluntary program with assistance from the EAC or as an ordinance mandated jointly by both Bloomington and Normal. Understanding that the main barrier to commercial recycling is usually the bottom line impact on profitability, cost savings may be realized through a non-exclusive franchise agreement system, where the EAC identifies geographically dense routes and negotiates the best price for businesses in the bid area. This may be combined with an ordinance or as part of a voluntary system. Feedback from stakeholder groups indicated that an ordinance approach would have the benefit of "leveling the playing field" for all businesses so any additional costs would not be disproportionately applied.

Construction & Demolition Materials Recycling

An estimated 21% of C & D waste is currently recycled in our community, with 51,155 tons landfilled annually. Construction and demolition waste reuse and recycling has proven to be economically feasible within the County; current tipping fees at the local C & D recycling facility can be equal or more economical than equivalent fees at the landfill. This is consistent with other areas in Illinois with C & D recycling including Lake County, where landfill rates and C & D recycling rates are relatively similar.[9]

Because of the cost savings and economic benefit provided to Bloomington-Normal, including lower tipping fees, C & D recycling should be increased by all means possible including an ordinance in Bloomington and Normal. This should be followed by an analysis of the benefit to the unincorporated areas of the County and other smaller municipalities. A C & D recycling ordinance on either the municipal or county level should allow flexibility in choice of recycling facilities; materials can be source-separated on-site by demolition crews to be recycled with

9. Willis, Walter, Interview with Tom Bierma. Personal Interview. June 29, 2017.

various service providers or a C & D recycling facility may be used.

Other communities in Illinois have had success with a C & D recycling ordinance, including Lake County and the City of Zion. In a phone interview, Walter Willis, Executive Director of the Solid Waste Agency of Lake County, explained that there has been good compliance and very little resistance to the ordinance, which he attributed to including demolition waste haulers in the ordinance drafting process. The county ordinance was phased-in over time, beginning with larger demolition projects and eventually including smaller projects; Willis indicated that most municipalities in the area have followed the same process. The community of Grayslake, Illinois includes a "safety valve" in their C & D ordinance, allowing projects to seek exemptions from the mandate if the recycling cost is more than 10% more expensive than landfilling. [10]

Organics

Food scraps comprise the bulk of landfilled organics, with only 10% of this volume currently recovered. A comprehensive sustainable food program must be implemented to reduce food waste, divert wholesome food to feed the hungry, and collect and utilize remaining food scraps. Food scrap collection should begin with the largest sources of food scraps, commercial and institutional food establishments.

Following the initiation of a systemic approach to reduce food waste, food recycling or composting should be improved through a voluntary system or the implementation of an ordinance to require food composting by large commercial or public institutions, restaurants, and grocery stores. Residential food waste can be addressed through a public drop off program; curbside food waste collection is unlikely to be cost effective in the near future.

Currently, a commercial food-waste composting service is provided by Midwest Fiber, providing transportation to Better Earth Compost in Bartonville, Illinois. The program is fairly small -scale currently, but a recent switch to Better Earth Compost as the food scrap recycler will allow for growth of the program. However, in the long-term, a more local, McLean County based compost facility would likely be the most cost effective option. Efforts should be made to facilitate the development of a new local facility.

Food waste composting creates possible revenue sources through secondary products like high quality compost or renewable energy. Methane generated and captured by anaerobic digesters can be used directly as an energy source or to generate electricity. This option should be investigated in the fourth quarter of the 20-year plan.

10. Willis, Walter. Interview with Tom Bierma. Personal Interview. June 29, 2017.

HHW and Other Difficult or Nontraditional Materials

Household hazardous waste (HHW) represents not only a significant environmental threat, but also a threat to the economic recovery of materials such as recyclables and organics. A permanent HHW collection facility should be established and funded in partnership with the Illinois EPA, which has the responsibility of helping local communities meet the need for HHW disposal. Opportunities should also be explored to improve or create programs for the recovery of electronic wastes, Freon or other coolant-containing white goods.

Illinois EPA has partnerships with four public HHW facilities, three of which are in the Chicago area and the fourth in Rockford. While the local partner funds and operates the facility, the Illinois EPA provides for disposal of all materials collected and absorbs the long-term generator liability for those materials. These public HHW facilities that collaborate with Illinois EPA are open to all Illinois residents to utilize free of charge and they accept most residentially-generated HHW materials, with a few exceptions. The EAC initiated discussions with the Illinois EPA about a downstate facility in McLean County and is currently on a list of interested communities; however, state funding for expansion of this program is currently on hold.

Increased Outreach and Technical Assistance

Ongoing coordination above and beyond the EAC's current solid waste program staffing levels is necessary to achieve the economic and environmental benefits of a comprehensive waste materials management program. An additional full-time solid waste program technician will ensure the goals set out in this twenty-year Materials Recovery and Resource Management Plan are accomplished.

The plan's implementation will benefit from increased communication and cooperation. The EAC will help create an informal waste advisory group composed of representatives from local waste and recycling service providers, institutions, and other relevant entities. This advisory group will meet as needed to provide feedback and input on waste issues in the community. This group will assist in finding cost efficiencies or revenue increases to help offset program funding needs, including technical assistance, education and outreach, and HHW collection.

Future Waste Facilities

This plan identifies the potential for multiple types of future waste processing, disposal, recycling, and/or composting sites. The specific locations of these potential sites are unknown. Throughout the implementation process priority will be given to sites outside immediate urban areas but near enough to be cost-effective, efficient and potential revenue generating sources. Size, expected costs and financing of these facilities are relative to the ultimately successful strategies listed for the identified priorities. Accordingly, these parameters will need to be worked out further along in the process and cannot be identified at this time.

C. Automatic Recycling Rate Goal Increases

This twenty-year Materials Recovery and Resource Management Plan outlines aggressive strategies to address existing gaps in waste recovery services in Bloomington, Normal, and McLean County. Accordingly, successful implementation of these strategies should quickly result in a significant jump in the community wide recycling rate, beyond the 15-year old recycling goal of 40%. In order to help drive continued improvement over the course of the twenty-year plan, we have set recycling rate goals that increase automatically every five years, independently of the success of reaching the earlier goal.

- **2002 Recycling Rate Goal: 40% -- Goal met in 2016**
- **2022 Recycling Rate Goal: 50%**
- **2027 Recycling Rate Goal: 60%**
- **2032 Recycling Rate Goal: 70%**
- **2037 Recycling Rate Goal: 80%**

HOST COUNTY AGREEMENT

This HOST COUNTY AGREEMENT ("Agreement") dated this 21st day of September, 2004, by and between American Disposal Services of Illinois, Inc. ("ADS"), a Delaware Corporation; and the County of McLean, Illinois ("County");

WITNESSETH:

WHEREAS, ADS owns a parcel of land totaling approximately 73 acres as described and shown on Attachment A. The parcel described and shown on Attachment A is hereinafter referred to as "the Property"; and

WHEREAS, ADS currently operates a landfill as shown on Attachment B ("Landfill"); and

WHEREAS, ADS intends to file an application ("Siting Application") with the County for siting a new Pollution Control Facility Landfill. The new Pollution Control Facility Landfill footprint and surrounding property owned by ADS shall hereinafter be referred to as the "Expanded Landfill"; and

WHEREAS, it has been proposed that ADS pay to the County, and ADS is willing to pay the County, a Host Benefit Fee to be used for the purpose of assisting the County in addressing the impact, if any, that the operation of the Landfill or the Expanded Landfill may have upon the County and for other general revenue needs of the County as the County may deem appropriate; and

WHEREAS, the County desires to secure, and ADS is willing to provide landfill disposal capacity within the County for the waste generated by residents, commercial establishments, institutions and industries located within the County that it is permitted by law to accept for disposal; and

WHEREAS, ADS is desirous of earning the good will of the citizens of the County by demonstrating its good faith in educating the community as to the nature of its operations in the County and demonstrating that its landfilling operations are, have been and will continue to be conducted in an environmentally sound manner; and

WHEREAS, the County is desirous of protecting the health, safety and welfare of its citizens, and in assisting with public education in accordance with Illinois law; and

WHEREAS, the County has not consented to, concurred in or objected to the proposed plans of ADS for the Expanded Landfill, and nothing in this Agreement shall be deemed an indication that the County has adopted any position on the proposed Siting Application, nor on ADS' operation of the existing Landfill, including where technical or detailed operating requirements are set forth below; and

NOW, THEREFORE, in consideration of the covenants set forth in this Agreement, the parties hereto, intending to be legally bound, hereby agree as follows:

1. **Incorporation of Recitals.**

The above recitals are incorporated as part of this Agreement as though fully set forth herein.

2. **Lands Covered.**

This Agreement covers the Property as described and shown in Attachment A and the Expanded Landfill.

3. **Effective Date.**

This Agreement shall be effective as of _____, 2004.

4. **Expiration Date.**

This Agreement shall expire on the later to occur of 30 years after the closing of the Landfill or 30 years after the closing of the Expanded Landfill.

5. **Ban on Hazardous Waste.**

ADS shall not knowingly accept, treat, or dispose of any waste which is defined as hazardous by the Illinois Environmental Protection Act, 415 ILCS 5/1 et seq. (the "Act") or the regulations adopted thereunder ("Hazardous Waste") at the Property. ADS shall comply with all applicable regulations of the Illinois Pollution Control Board ("IPCB") relative to load checking and shall immediately inform the County orally and in writing of any Hazardous Waste that has been accepted, received, stored, treated, disposed, or transported to or from the ADS Property.

6. **Guaranteed Landfill Capacity.**

Subject to the conditions set forth below, and if siting approval is received, for 7 years from the date that ADS obtains final, unappealable permits from the Illinois Environmental Protection Agency ("IEPA") to develop the Expanded Landfill, ADS shall provide the County with disposal capacity at the Landfill and Expanded Landfill for all of the solid waste and special wastes, which ADS is permitted by law to accept for disposal, which are not defined as Hazardous Waste ("Nonhazardous Solid Waste") and which are generated within the County's boundaries. ADS' obligation to provide the County with disposal capacity shall extend only to Nonhazardous Solid Waste which is initially generated and abandoned or discarded within the County, and specifically excludes out-of-county waste that may be delivered to a waste transfer station located within the County.

Prior to the first of each calendar year during the operating life of the Landfill and the Expanded Landfill, the County shall provide ADS with an estimate of the amount ("Annual Estimate") of Nonhazardous Solid Waste it expects to be generated within the County for that year, using methodologies which are consistent with the methodologies used to prepare the Needs Assessment portion of the County's Solid Waste Management Plan. Each year during this term, ADS shall reserve sufficient capacity to dispose of the quantity of Nonhazardous Solid

Waste estimated by the County. The County reserves the right to increase its Annual Estimate by up to 20% at any time in the event unforeseen circumstances, including but not limited to natural disasters such as storms and tornadoes, render its original estimate inadequate. The reservation of disposal capacity for the County's waste shall not be cumulative, and should the estimated disposal capacity not be utilized by the County during any calendar year, that capacity may be utilized for other than County waste. ADS agrees to comply with the procedures specified in Attachment C hereto, or with other procedures approved in advance by ADS and the Regional Pollution Control Site Hearing Committee of the McLean County Board, in submitting to the County an annual determination of ADS' remaining landfill capacity and in implementation of Section 6 of this Agreement.

7. Assignment of Rights.

This Agreement shall be binding upon ADS and its controlling interest transferees, successors and assigns. The Regional Pollution Control Site Hearing Committee may require an additional written commitment by the transferee to assume and comply with the duties and obligations of this Agreement. Further, any such conditions imposed upon the transferee pursuant to this Agreement may be modified by agreement between the transferee and the Regional Pollution Control Site Hearing Committee of the McLean County Board.

8. Covenant.

This Agreement shall constitute a covenant in the nature of a covenant running with the land. ADS agrees to execute all additional documents necessary for the recording of this Agreement in the chain of title all of the Property and Expanded Landfill.

9. Records.

ADS shall provide the County, free of charge, copies of all of the following documents in any manner connected with the Property and the Expanded Landfill:

a. those submitted by ADS or its agents or consultants to any state or federal environmental regulatory agency; and

b. correspondence with any state or federal environmental regulatory agency; and

c. those filed with or received from any state or federal regulatory agency relevant to charges, complaints or citations or environmental violations made by any governmental authority; and

d. those deemed reasonably adequate and sufficient by the Regional Pollution Control Site Hearing Committee of the McLean County Board pertaining to the amount of Nonhazardous Solid Waste received and the County which generated that waste.

10. Well Monitoring.

ADS shall contact the owners of record as of the Effective Date of this Agreement of all water supply wells within 1,500 feet of the perimeter of the Property, by certified mail, return receipt requested, seeking permission from the owners to sample their wells, within 90 days of the Effective Date of this Agreement, for background, for two consecutive quarters in a six-month period, and for routine monitoring. After IEPA has issued an operational permit to construct the Expanded Landfill, by certified mail, return receipt requested, within 90 days of the issuance of the IEPA operational permit, ADS shall contact the owners of record of all water supply wells within 1,500 feet of the perimeter of the Expanded Landfill seeking permission from the owners to sample their wells. Within 90 days of the issuance of the IEPA operational permit, for background, for two consecutive quarters in a six month period, and for routine monitoring, ADS shall use its best efforts to obtain permission to monitor the wells. The County may assist ADS in obtaining permission to access the wells from the property owners. The well monitoring program shall proceed as follows:

a. ADS shall conduct, at its own expense, an initial assessment of each water well to determine construction and location information in conjunction with ADS.

b. ADS shall, at its own expense, contract with a laboratory which has been awarded the IEPA certificate of approval to perform the specified chemical analysis. A certified copy of the IEPA license certificate shall be sent by ADS to the County in accordance with the notice provisions of Section 22 of this Agreement.

c. In order to establish initial water quality, the concentrations or parameters in water samples from each water well shall be determined and reported for four consecutive quarters during the first year. The laboratory analysis shall be reviewed and interpreted by a licensed environmental engineering firm ("Third Party Consulting Firm") selected by the County. A report by the Third Party Consulting Firm shall be sent to the County in accordance with Section 22 of this Agreement. The analysis shall be for, but not limited to, those constituents contained for Class I groundwater in 35 Ill. Adm. Code 620.410 and the routine constituents listed in paragraph 10(d). Organic constituents, such as Volatile Organic Constituents (VOC's), pesticides, and herbicides within the Class I groundwater list may be sampled once during the first year.

d. After the initial water quality has been established, each water well shall be sampled semi-annually by ADS as long as the Landfill and/or the Expanded Landfill remain in operation. The samples shall be analyzed for, but not limited to, the following list of routine constituents:

Chloride Cl, Total MG/L
Sulfate SO, Total MG/L
Total Organic Halogen (TOX) UG/L (Unfiltered)
Nitrate-Nitrite N, DISS MG/L
Boron B, Total UG/L
Ammonia (NH3 and NH4) as N, Total MG/L
pH STD Units (Field Measured)
T Alkalinity, as Ca Co, MG/L Lab
Total Organic Carbon (TOC), as C, MG/L
Residue on Evaporation (ROE), MG/L

The list of routine constituents may be expanded if such a need is demonstrated by the Third Party Consulting Firm selected by the County. All expenses associated with the Third Party Consulting Firm's services shall be paid by ADS.

e. This sampling shall continue annually until thirty (30) years after the IEPA certifies the closure of the Landfill or the Expanded Landfill, whichever occurs later ("the term of this Agreement"), at ADS' expense.

f. Reports relating to such monitoring shall be timely provided by ADS, at its own expense, to the County in accordance with the notice provisions of Section 22 of this Agreement and to owners of affected wells.

Should any of the semi-annual or annual test results demonstrate, as determined by the Third Party Consulting Firm selected by the County and paid by ADS, that the groundwater from a well has been contaminated, ADS shall cause to be monitored the well(s) on a quarterly basis for the routine list of constituents in paragraph 10(d) and annually for the background list of constituents in paragraph 10(c) during the term of this Agreement. If ADS can prove that the well was not contaminated by the Property or the Expanded Landfill, the well monitoring frequency shall return to a semi-annual or annual basis for the routine list of constituents in paragraph 10(d).

11. Contamination.

If, at any time after the date that ADS first accepts waste at the Expanded Landfill and during the term of this Agreement any water supply well located within 1,500 feet of the perimeter of the Property or the Expanded Landfill is contaminated by the Landfill or Expanded Landfill or by the other operations on the Property or the Expanded Landfill, ADS agrees to provide an alternate potable water supply to that owner, which may include a new well to replace the contaminated well, within twenty-four (24) hours of notification to ADS from the owner of the contaminated well that the well, based upon the laboratory analysis and the engineering interpretation of samples submitted to an IEPA certified laboratory, has been so contaminated as determined by the County through its third party consulting firm. For purposes of this Agreement, the terms "contaminated" and "potable" shall have the meanings ascribed to them as set forth in Sections 3.63 and 3.65 of the Act and as set forth in the Class I groundwater standards in 35 Ill. Adm. Code 620.410. Should the aforesaid laboratory analysis show that water from any of the covered water supply wells exceeds the Class I groundwater standards and the background concentrations, that water supply well shall not be considered to be contaminated until 30 days subsequent to the date ADS is notified of the laboratory analysis. Immediately

thereafter, the obligations of this paragraph shall become applicable and ADS shall be obligated to provide an alternate potable water supply as required hereunder. During that 30 days ADS shall provide the owner of that well with bottled or trucked-in potable water. Within 30 days, the County's Third Party Consulting Firm shall resample the well and analyze the sample for the constituent(s) which exceed(s) the Class I groundwater standard(s) and the background concentration(s) as established in paragraph 10(c) of this agreement. If the constituent(s) exceed(s) the Class I groundwater standard(s) and the background concentration(s), the well shall be considered contaminated and the well shall continue to be monitored for the routine list of constituents in paragraph 10(d) on a semi-annual basis.

ADS shall not be responsible to provide an alternative potable water supply, nor shall it be responsible for monitoring any more frequently than semi-annually, for any wells that ADS can prove were not contaminated by the Property or the Expanded Landfill or by other operations on the Property or the Expanded Landfill. All expenses associated with the work performed by the County's third party consulting firm in accordance with this paragraph 11 shall be paid by ADS.

12. Property Value Guarantee Plan.

ADS agrees to comply with the program described as the "ADS Property Value Guarantee Plan" set forth in Attachment D hereunto and hereby incorporated by reference herein.

13. Environmental Contingency Provision.

In addition to the financial assurance requirements of the State of Illinois, ADS shall obtain the unconditional guarantee of its obligations hereunder from its corporate parent, on the form set forth in Attachment E and hereby incorporated by reference herein.

ADS shall also maintain an environmental pollution liability policy of insurance in an amount not less than One Million Dollars ($1,000,000) for each loss and Two Million Dollars

($2,000,000) for all losses for its Landfill or Expanded Landfill located in McLean County Illinois, naming McLean County, Illinois as an additional insured under the policy of insurance and shall provide the Regional Pollution Control Site Hearing Committee of the McLean County Board with a copy of the certificate of insurance in force and effect and annual proof in the form of an insurance certificate showing that coverage remains in force and effect in the amounts required naming McLean County, Illinois, as an additional insured.

14. Cooperation with Economic Development Council (EDC) of Bloomington Normal, McLean County.

ADS agrees to work with the EDC in using the Landfill and the Expanded Landfill as a means to help attract new commercial and industrial facilities to the County. This could include, at the County's request, ADS providing design and operating information on the Landfill and the Expanded Landfill and ADS offering a disposal agreement (terms to be negotiated on a case-by case basis) to these prospective businesses which secures the same guarantee of disposal capacity as is offered to the County.

15. Host Benefit Fee.

Commencing on the Effective Date of this Agreement, ADS shall pay to the County a Host Benefit Fee for Non-hazardous Solid Waste disposed at the Landfill or Expanded Landfill. It is also agreed that Pollution Control Waste is exempt from the Host Benefit Fee. The Host Benefit Fee may be used by the County for such benefits, services and facilities as are customarily and legally permitted to be funded from the County's general fund. The Host Benefit Fee shall be calculated as follows:

a. Beginning on the Effective Date of this Agreement, the Host Benefit Fee shall be $5,000.00 per month or $1.27 per ton of Nonhazardous Solid Waste disposed of at the Landfill or Expanded Landfill per month, whichever is greater.

b. Beginning on the date ADS is granted the final, unappealable permits by the IEPA to develop the Expanded Landfill, the Host Benefit Fee shall be $15,000.00 per month or $2.54 per ton of Nonhazardous Solid Waste disposed of at the Landfill or Expanded Landfill per month, whichever is greater. Such payments shall conclude on such date that ADS or its successor/assignee permanently ceases the acceptance of Nonhazardous Solid Waste at the Landfill or Expanded Landfill, whichever date is later.

The Host Benefit Fees hereinbefore described shall be payable to the County on a monthly basis commencing on the 15th day of the month after this Agreement is executed, and thereafter on or before the 15th day of each month thereafter. Any Host Benefit Fee payment not received by the County by the above deadline shall be subject to a late charge of one (1%) percent of the total Host Benefit Fee per month. Such late charges shall accrue per month or fraction of the month in which the payment is late.

Each Host Benefit Fee payment shall be accompanied by a form prescribed by the County and stating the weight of the Nonhazardous Solid Waste received by the ADS Property during the payment period providing such other information as may be necessary for the County to assure compliance with this Agreement. This form shall be signed by ADS. The County shall be entitled to audit business records of ADS not less than on an annual basis to verify the amount of the Host Benefit Fee payments. ADS shall make available to the County scale tickets, sales invoices, daily billing summaries, account records and such other business records the auditor may request to conduct the audit. Provided, however, that ADS may provide these records to the County as confidential business records and the County agrees that such records shall be kept confidential, consistent with Section 18 of this Agreement, and such confidential business records shall not be provided for review or disclosed pursuant to a request under the Freedom of Information Act, unless otherwise ordered by a Court of Law.

16. Compliance with Applicable Laws, Rules and Regulations.

ADS warrants that it will at all times conduct its operations at the Landfill and the Expanded Landfill site in material compliance with all applicable laws, rules and regulations of the State of Illinois and the United States of America relevant thereto. The acceptance of payment of the Host Benefit Fee under this Agreement shall not be construed as a waiver by the County of material compliance by ADS with all applicable laws, rules and regulations; nor shall acceptance of said payment by the County otherwise restrain or prohibit the County from taking such legal action as may be necessary to protect the health, safety and general welfare of the residents of the County in the event of any material violation of any said laws, rules or regulations by ADS.

17. County Duties or Responsibilities.

The terms of this Agreement shall not be construed in any manner to impose upon the County any duties or responsibilities to provide any services or facilities to ADS beyond those which the County customarily provides to residents and businesses of a similar nature within McLean County.

18. County Solid Waste Management Plan.

The County shall include reference to this Agreement in its Solid Waste Management Plan and any modification thereto, provided its inclusion and the process by which it is included is consistent with the requirements of the Local Solid Waste Disposal Act and the Solid Waste Planning and Recycling Act.

19. Indemnification.

This Agreement does not create any legal relationship between ADS and the County (such as a joint venture or partnership) with regard to operation of the Landfill or the Expanded Landfill. Nor does the County undertake, by virtue of this Agreement, any responsibility or

liability for compliance with any laws, rules or regulations relating to the operation of said Landfill or Expanded Landfill or the depositing, storage or control of any wastes within the area of the Landfill or the Expanded Landfill. In the event that the County should be joined as a defendant in any legal action relating to the operation of the Landfill or the Expanded Landfill by ADS or alleging any environmental liability regarding the Landfill or the Expanded Landfill relating to such operation on the basis of this Agreement, ADS agrees to indemnify and save harmless the County from such liabilities or damages as may be claimed in said legal action, together with reasonable attorney's fees, expert fees and costs incurred by the County to defend itself against such legal action, except for actions involving the negligence of the County, its agents, employees or representatives or for actions not related to this Agreement.

20. ADS' Waste Acceptance Policy.

Notwithstanding the provisions of this Agreement, ADS has no obligation to dispose of any waste that does not satisfy ADS' waste acceptance policy. However, ADS specifically agrees to accept for disposal, at no charge, dead animal carcasses which originated on County highways and are delivered to the Landfill or Expanded Landfill by the County Highway Department.

21. Amendment to Agreement.

This Agreement may not be amended except by an Agreement signed in writing by all parties hereto.

22. Delivery of Notices.

All notices under this Agreement, including notices required to be made to the Regional Pollution Control Site Hearing Committee or County Administrator shall be personally delivered or sent by certified mail to the Chairman of the McLean County Board, P.O. Box 2400,

Bloomington, Illinois, 61702-2400 and to ADS at 2112 West Washington Street, Bloomington, IL 61704 and all notices shall be effective upon receipt.

23. Landfill Design and Operation.

ADS shall have sole design control over the Landfill and the Expanded Landfill during the life of the facilities, subject only to the right of the County to require that it be designed in compliance with all applicable federal, state, and local laws and regulations.

ADS shall operate the Landfill and Expanded Landfill in a manner to minimize the impacts on the surrounding land uses. More specifically, the following operating standards shall apply to the operation of the Landfill and the Expanded Landfill.

a. Excessive Wind.

ADS shall stop accepting waste subject to wind entrainment and will cover the active face during excessive winds. A wind speed indicator shall be located at the active face of the Landfill and the Expanded Landfill within 30 days of the Effective Date of this Agreement. Excessive winds are defined as one or all of the following:

i. during tornado warnings as reported by the National Weather Service for McLean County, Illinois.
ii. when sustained winds reach 35 mph.
iii. when site operations are not able to control paper blowing off-site, in the opinion of the Director of the McLean County Building and Zoning Department.

b. Litter Control.

ADS shall erect and maintain a 6-foot high chain link perimeter fence. ADS shall utilize a sufficient number of temporary litter fences placed end to end to line the entire leeward side of the active face. ADS shall inspect the Property and the Expanded Landfill on a daily basis to insure litter is being adequately controlled and ADS shall

have sufficient manpower available to pick up windblown paper if excessive litter accumulates due to excessive winds.

c. Dust Control.

ADS shall use its best efforts to prevent dust from leaving the Landfill and Expanded Landfill. ADS agrees to promptly correct said dust problems when identified by the McLean County Building and Zoning Director and communicated to ADS by same. Sprinkling agent

d. Mud Tracking.

ADS shall provide and maintain a sufficient length of road on the Property and the Expanded Landfill to allow out-going trucks to reach a speed sufficient to aid in tire cleaning. ADS shall provide periodic cleaning of the paved main access to roads to the fill area to prevent accumulation of mud and fines.

e. Fire Protection.

To minimize the threat of fire at this facility, several steps shall be taken. This includes, but is not limited to, restricting public access, checking incoming loads for the potential for fire hazard, maintaining equipment, prohibiting smoking, and maintaining a gas detecting system. Instruction in fire fighting procedures shall be routinely provided for site personnel. Open burning shall be prohibited at the Landfill and Expanded Landfill.

The Landfill and Expanded Landfill shall maintain several types of equipment on-site that may be used in fire fighting efforts. Earthmoving equipment that is utilized on a daily basis for landfill operations may be used to move and apply cover material to smother fires. Cover material is readily available on-site for fire control purposes. The water truck, with full capacity, shall be available and on site to assist with fire control.

Water from the on and off-site retention basin locations shall be used as a supplementary source. Should a fire occur at the Landfill or Expanded Landfill, the burning material shall be removed to a pre-selected location away from the daily fill face and shall be segregated and smothered with clean soil. The Bloomington Township Fire Department shall be contacted by ADS if ADS personnel are unable to extinguish a fire. Emergency phone numbers shall be posted in the maintenance building and scale house. Radios shall be maintained on equipment and in the buildings for efficient communication.

The facility shall maintain a supply of fire extinguishers that can be utilized. These extinguishers shall be located in the maintenance building and scale house. Dedicated fire extinguishers shall be carried on the equipment at all times and can be utilized to control any small fire that may occur. Extinguishers shall be maintained in conformance with State and local fire codes and regulations.

f. Traffic Safety.

The transportation plan for the Landfill and Expanded Landfill utilizes the existing off-site roadways. It is expressly agreed by ADS that all vehicles entering and exiting the Landfill and Expanded Landfill shall have a gross weight not to exceed 73,280 pounds. These off-site roadways include Oakland Avenue. The traffic patterns of these public roads that access the facility have been analyzed and the operation of the Landfill has had a negligible effect on traffic in the site vicinity.

A combination of existing on-site all-weather roadways and newly constructed roadways are used for on-site traffic. The main entry roadway is located on Oakland Avenue. Fencing with a lockable gate restricts unauthorized access to the site. The main entry road located on Landfill or Expanded Landfill property shall have an all-weather surface from Oakland Avenue to the weight scale. The on-site road used for one- and

two-way traffic shall be a minimum of 10 to 20 feet wide, respectively. Also, all roadways shall be crowned to promote drainage. Mud tracking off-site is controlled by the travel distances from the active fill face to the County road and installation of rumble strips near the scale such that any loose mud shall be dislodged from the delivery vehicle prior to exiting the site. A sweeper shall be utilized to collect mud from on-site roadways and public roadways near the entrance, if necessary. Traffic signs are posted, where applicable, to assist vehicles with entering and exiting the facility, and accessing the active face. Only landfill and authorized personnel will be allowed into the Landfill and Expanded Landfill before or after operating hours. Trucks shall not be allowed to park on public roadways in front of or near the entrance. Arriving trucks must travel at least two truck lengths apart. All open trucks and trailers shall be tarped or covered and swept out at the active face prior to leaving the site. The drivers must come to a complete stop prior to exiting the main entrance. Drivers shall be periodically notified and reminded of the site procedures. Drivers who disregard these procedures shall be reprimanded and upon future infractions shall be denied future access to site.

g. Hours.

ADS shall accept waste Monday through Saturday at the Landfill and Expanded Landfill. Operating hours shall be no sooner than 6:00 a.m. and no later than 6:00 p.m. on Monday through Friday. Operating hours shall be 6:00 a.m. through Noon on Saturday. Exceptions may be made for declared emergencies, in which case the parties hereto shall abide by the rules and regulations of the Illinois EPA.

h. Noise.

ADS' landfill equipment shall have properly installed and operating manufacturer mufflers at all times.

24. County Obligations.

The County, provided that the Siting Application for the Expanded Landfill is approved, shall utilize its best effort to assist ADS in obtaining all necessary permits from the Illinois Environmental Protection Agency for the construction and operation of the Expanded Landfill.

25. Force Majeure.

The obligations with respect to the performance of this Agreement by either party (except for the payment of money, as explained further below) shall be suspended and extended in the event, and during the period, that such performance is prevented, hindered, or delayed by a cause or causes beyond the reasonable control of either party including, without limitation, Acts of God (except weather conditions normal for the geographic area of the facility); epidemic, landslide, lightning, tornado, earthquake, fire, explosion, flood or similar occurrence; an act of the public enemy, war, blockade, insurrection, riot, general unrest, civil disturbance or other similar occurrence that may have a material adverse effect on the construction or operation of the Landfill or the Expanded Landfill; and any change in Law which has a material effect on the construction or operation of the Landfill or the Expanded Landfill, including the order or judgment of any court, provided such order or judgment is not the result of negligence, failure or wrongful action or omission on the part of the party involved. In the event of disruption of services under any such circumstances, each party will make every reasonable effort to overcome the cause of cessation of services and to reopen the Landfill or the Expanded Landfill as soon as practicable after the cessation of the cause of suspension of services.

ADS' obligation with respect to the minimum $5,000 Host Benefit Fee as required by Section 15(a) of this Agreement shall be suspended in the event that the IEPA does not timely complete review or grant ADS' permit application to develop, construct or operate the Landfill Expansion within the 180-day time period to do so pursuant to Section 39(a) of the Illinois

Environmental Protection Act, 415 ILCS 5/39(a). During the time of suspension, ADS shall pay to the County a Host Benefit Fee of $1.27 per ton of Nonhazardous Solid Waste disposed of at the Landfill or Expanded Landfill per month until IEPA grants a final, unappealable permit to ADS for its Landfill Expansion. Thereafter, the provisions of Section 15(b) of this Agreement shall take effect.

26. Enforcement.

The parties agree that either party shall have the right to enforce this Agreement by an action in McLean County Circuit Court. Each party agrees to notify the other party of any alleged violation or breach of this Agreement, in an effort to resolve the dispute without requiring suit in McLean County Circuit Court.

27. Notice of Violation

Prior to commencing any suit to enforce this Agreement, the complaining party agrees to give the other party reasonable written notice of any alleged non-compliance, whereupon the parties agree to make a reasonable effort to resolve the alleged violation or dispute to the mutual satisfaction of both parties.

If a material violation of this Agreement is not corrected by ADS to the satisfaction of the County, the parties agree that the County may seek any and all appropriate relief.

28. Confidentiality

The County shall not disclose or release any documents, records, or other information that constitutes proprietary or confidential business information of ADS, including, but not limited to, information regarding customers and pricing to any third parties unless ordered to do so by the Court. It is intended that disclosure of such information be limited to public officials in their official capacity with the County who have a need to review such information for purposes of enforcing this Agreement.

29. Insolvency, Bankruptcy and Memorandum of Agreement.

If ADS, or its successors and assigns for purposes of this Agreement, shall (1) at any time during the term of this Agreement have proceedings in bankruptcy instituted against it and be unable to pay its debts as they become due, or (2) if any execution or attachment of the Property or the Expanded Landfill shall issue against ADS, or its successors and assigns for the purposes of this Agreement, whereupon the Property or the Expanded Landfill shall be taken or attempted to be taken, or (3) a receiver or trustee shall be appointed for the Property or the Expanded Landfill, or (4) if this Agreement shall, by operation of law, devolve upon or pass to any person or persons other than ADS, or its successors and assigns for purposes of this Agreement, then, and in each of said cases, County, at its election may terminate this Agreement and be discharged from any future obligations of performance. The parties agree to execute and record a Memorandum of Agreement setting out the identities of the parties, the existence of this Agreement, and a description of the Property or the Expanded Landfill.

30. Severability and Applicable Law.

If any provision or subsection hereof or the application thereof to any person or circumstances is held invalid, the other provisions of this Agreement and/or their applicability to other persons or circumstances shall not be affected thereby. It is declared to be the intent of this Agreement that the same would have been adopted had such invalid provision, if any, not been included herein. This Agreement shall be governed by the laws of the State of Illinois.

31. Authority to Enter Into Agreement.

ADS hereby represents and warrants that it is a valid and existing Delaware corporation authorized to do business in Illinois and that the individuals executing this Agreement have been duly authorized by the corporation to act on its behalf and enter into this Agreement. ADS agrees to provide the County with sufficient proof of said authorization which proof shall include

but not be limited to an appropriate corporate resolution authorizing the execution of this Agreement.

32. Agreement Review and Amendments

This Agreement shall be subject to review every year from the Effective Date of this agreement, or any amended agreement, at the request of either party. This provision does not prevent the parties upon mutually agreeing at any time to discuss problems or any matters of interest or concern. The purpose of the annual reviews will be to discuss the status of this Agreement, or any amended agreement, and allow each party to suggest further amendments based upon a change in circumstances arising since the time of this agreement or any amended agreement.

33. Repeal of Tipping Fee Ordinance

Upon execution of this Agreement, the County's Tipping Fee Ordinance and Agreement entered into by the parties hereto dated November 19, 1991, shall be repealed and rescinded respectively.

34. Termination

This Agreement shall terminate on the earlier date of either of the following two occurrences:

1. a final unappealable decision, ruling, order or ordinance is issued denying siting approval of the Siting Application for the Expanded Landfill, or the period of time to appeal such decision, ruling, order or ordinance has expired; or

2. a final, unappealable decision, ruling or order is issued upholding the denial of a permit from the IEPA to develop or operate the Expanded Landfill, or the period of time to appeal such decision, ruling or order has expired.

Notwithstanding the provisions of Section 33, if the Agreement is terminated, the County shall have the right to reinstate and/or reenact its Tipping Fee Ordinance and Agreement.

IN WITNESS WHEREOF, the parties hereto have caused the signatures of their legally authorized representatives to be affixed hereto on the day and year indicated on the first page of this Agreement.

MCLEAN COUNTY LANDFILL SITE PLAN

ATTACHMENT C

PROCEDURES FOR DETERMINING REMAINING CAPACITY

and

THE ORIGIN OF WASTE

I.

METHODOLOGY

Calculation of the remaining capacity of a landfill involves calculating the volume between the existing grades and the permitted top of waste grade. The landfill owner or operator must survey the landfill's existing grades at the end of each reporting period. Specific requirements for the reporting period, topographic maps, and calculations are detailed below.

Reported Period. The recommended reporting period is from January 1 to December 31. This provides for a simple calculation of the annual usage of airspace. However, it is not always possible to conduct surveys on these dates; therefore, this is not a hard deadline. In any event, the surveys should be scheduled so that they are approximately one year apart and the calculations can be completed before the IEPA's reporting deadline. The landfill owner or operator is required to report the exact dates when the surveys were performed.

Topographic Surveys and Maps. Topographic surveys may be conducted using aerial photogammetry, traditional field surveying methods, or a combination of these two methods. If a previous topographic map exists, only those areas affected by landfill development and filling need to be surveyed. Regardless of the method used, the survey shall be accurate to within one foot vertically. The horizontal scale of the resulting topographic map shall be equal to or greater than 1-inch equals 200 feet. The maximum contour interval shall be two feet. Aerial photogammetry shall be used at least every 5 years. All topographic maps shall show the permitted limits of waste placement and the actual date of the aerial or field survey. Areas that exceed permitted horizontal and vertical limits shall be highlighted and noted on topographic maps.

The topographic maps showing the existing and previous grades will have to be modified to account for all permitted areas that are undeveloped, all stockpiles on the landfill, and any other features that could affect the remaining capacity calculations. The modifications are made by blending the contours of the topographic maps to those on the facility's design drawings. In all, three topographic maps will be used. These include: 1) grades at end of previous reporting period (and the beginning of the current reporting period); 2) grades at end of the current reporting period; and, 3) grades of the permitted top of waste surface. These three maps will be used to calculate the volume of airspace consumed over the reporting period and the volume of airspace remaining at the landfill. In theory, only the second map will need to be generated as the other were prepared for previous reports.

Airspace Calculations: Two volumes will be calculated. First, the airspace consumed over the reporting period is calculated by determining the difference between the grades of the top of waste (or the permitted base grades for undeveloped areas) at the start of the reporting period and the grades of the top of waste at the end of the reporting period. Second, remaining airspace is calculated by determining the difference between the grades of the top of waste at the end of the reporting period and the grades of the final top of waste surfaces.

Volume calculations can be performed using manual or computer methods. A typical manual method is an end-area cross section method. If this type of method is chosen, the distance between cross sections shall be sufficiently spaced to calculate the desired volumes.

A computer method may also be used to calculate volumes. If the topographic maps are in a CAD format, many software packages will calculate the difference between two surfaces. The difference between the two surfaces will be the airspace calculations. It is important that

any adjustments to the calculations or maps be made before finalizing the resulting calculations. These adjustments must be thoroughly documented in the submittal.

Whichever method is chosen, the landfill owner or operator shall attach all calculations and assumptions to the remaining capacity submittal to demonstrate the airspace volumes are correct.

Gate Receipt Calculations. Gate receipt calculations are important to show how much waste can be placed in the landfill on an as-received basis. The owner or operator is required to submit calculations demonstrating the total volume of all wastes accepted at the landfill during the reporting period. The total volume of all waste (including fee-exempt wastes) accepted during the reporting period shall coincide with the volumes and tonnage reported along with the host fee submittal. If the landfill is equipped with scales and the host fee is reported in tons, the as-received waste density in tons per cubic yard shall be submitted.

II.

WASTE ORIGIN

For purposes of determining the volume of the reserved disposal capacity actually utilized during any calendar year for waste originated from within the County pursuant to Section 6 of the Agreement, ADS shall provide the County with the volume it has determined was disposed that originated from within the County during any calendar year. ADS' determination shall be based upon computer-generated records maintained by ADS which identify each load by waste hauler and volume of waste disposed by that hauler, along with ADS' knowledge of the waste hauler's current and historic collection practice and geographic location covered by such collection practice. The County shall be entitled to review the

computer-generated records at ADS not less than an annual basis to verify the information provided by ADS. ADS shall make available to the County the scale tickets, and such other business records the auditor may request to conduct the review. Provided, however, that ADS may provide these records to the County as confidential business records and the County agrees that such records shall be kept confidential, consistent with Section 18 of this Agreement, and such confidential business records shall not be provided for review or disclosed pursuant to a request under the Freedom of Information Act, unless otherwise ordered by a Court of Law.

ATTACHMENT D

PROPERTY VALUE GUARANTEE PLAN

ADS PROPERTY VALUE GUARANTEE PLAN

As a condition of the Host County Agreement with McLean County, which is incorporated by reference herein, ADS agrees to provide the following Property Value Guarantee Plan.

I. Definitions

A. The definitions of the terms defined in the Host County Agreement are to be utilized in interpreting this Plan.

B. Additional definitions.

1. "Application" means the application provided by ADS and completed by an Owner which is used to determine the eligibility of the Owner's Property under the Guarantee.

2. "Appraiser" means a properly licensed appraiser by the State of Illinois.

3. "Guarantee Certificate" means the certificate provided by ADS to an Owner establishing the Value of Property.

4. "Guarantee Plan" means the Property Value Guarantee Plan of ADS set forth in this document.

5. "Loss" means the difference between the Value at Sale and the Value shown on the Guarantee Certificate.

6. "Occupied Dwelling" means a permanent building that is currently being used on a regular basis for human habitation.

7. "Owner" means the legal entity, individual or individuals holding title to any Property or the legal entity, individual beneficiary or beneficiaries of a trust which holds title to any Property on the effective date of the Host County Agreement.

8. "Property" means real property eligible to qualify for the benefits of this

Property Value Guarantee Plan. Property includes land, but only existing structures as well as improvements and additions to those existing structures.

9. "Realtor" means a person licensed by the State of Illinois to sell real estate.

10. "Sale of Property" means the transfer of the ownership of an Owner where the Owner is willing to sell and the Purchaser is willing to purchase the Property in an arms length transaction at a certain price.

11. "Value" means the fair market value of a Property evidenced by the Guarantee certificates as of the date of the Guarantee Certificate.

12. "Value at the Sale" means the fair market value of a Property at the time of Sale.

II. Eligibility for the Guarantee Plan

Each Owner of real property of record, prior to the date ADS is issued an IEPA Permit to construct the Expanded Landfill, which is located within the area identified as being within one quarter mile of the Expanded Landfill, is eligible to qualify for the benefits of this Guarantee Plan with respect to the Owner's Property, provided there is an Occupied Dwelling on the real property that is within one quarter mile of the Expanded Landfill, subject to the terms and conditions stated in this Property Value Guarantee Plan and subject to such Owner's compliance with the requirements of this Property Value Guarantee Plan.

III. Procedure for Qualification

A. Application.

Within 60 days of the beginning of the permitted operation of the Expanded Landfill, ADS shall send, by certified mail, an Application to each taxpayer of record as determined by the authentic tax records of the County in which the real property is located for the real property

located within the area identified as being within one quarter mile of the Expanded Landfill. An Application shall be completed by the Owner and returned to ADS by the date specified in the Application which shall be no sooner than sixty days after the Application is mailed by ADS. Any owner failing to complete and return the Application within the specified time period will not qualify for the Property Value Guarantee Plan.

B. Determination of Value.

1. After receiving a completed Application from an Owner, ADS shall arrange for an Appraisal of the Property by an Appraiser to determine the Value of the Property. ADS shall make a copy of the Appraisal available to the Owner.

2. If an Owner disagrees with the Value of the Property as determined in the Initial Appraisal, the Owner may arrange for a second Appraisal at the Owner's expense, which Appraisal shall be completed by an Appraiser within 30 days of the Owner's receipt of the initial Appraisal. The Owner shall send Appraisal to ADS within two weeks of its completion. If the difference between the Appraisals is five percent (5%) or less of the greater Appraisal, the Value shall be the average of the two Appraisals. If the difference between the two Appraisals is greater than five percent (5%) of the greater Appraisal, then a third Appraisal shall be conducted by an Appraiser chosen jointly by the Owner and ADS and shall be completed within 90 days of the Owner's receipt of the initial Appraisal. The Value shall be determined from the third Appraisal. The cost of the third Appraisal will be shared equally by ADS and the Owner.

C. Guarantee Certificate. After determination of the Value of the Property, ADS shall send to the Owner a Guarantee Certificate which establishes that the Owner has qualified for the benefits of the Property Value Guarantee Plan and is entitled to compensation for any Loss directly attributable to the operation of the Expanded Landfill.

D. Revised Value. Upon request of an Owner, ADS will conduct a new Appraisal of the Property at ADS's expense if: (i) seven (7) years have elapsed since the issuance of a Guarantee Certificate with respect to the Property, (ii) at least $10,000.00 in improvements to the Property have been documented, which improvements shall be of the type which would increase the tax basis of the Property under the Internal Revenue Code, and (iii) a copy of receipts or other written documentation for the improvements have been provided. Upon completion of the revised Appraisal, the Value of the Property will be adjusted and a revised Guarantee Certificate will be issued. If the Owner disagrees with the revised Appraisal, the procedure described in Section B.2 above shall be available to the Owner.

IV. Benefits Provided by the Guarantee Plan

An Owner who has qualified under the terms of the Guarantee Plan and received a Guarantee Certificate shall receive compensation from ADS for the portion of any Loss directly attributable to the operation of the Expanded Landfill based upon the initial determination of value as outlined above. Compensation paid by ADS will be equal to the portion of the Loss directly attributable to the past and current operations on the Expanded Landfill. The Guarantee Plan does not provide benefits for any Loss which is not directly attributable to the operation of the Expanded Landfill.

V. Owner Agreements

To be eligible to receive benefits under this Guarantee, an Owner shall:

1. Notify ADS in writing within two weeks after listing the Property for sale with a Realtor for 180 days;

2. Notify ADS in writing within one week of the receipt of an offer to purchase the

Property and include a copy of the terms of the offer signed by the potential buyer.

3. Accept any bona-file offer during the 180 day listing period in which the Value of Sale meets or exceeds the Value of the Property.

4. If the Owner desires to accept an offer for less than the Value of the Property at any time, he or she shall first give to ADS the right, but not the obligation, to at any time within 30 days from its receipt of such notice to purchase the Property at the price offered by such other party; and

5. Permit ADS, its agents or employees the right to appraise the Property.

6. If ADS does not exercise its right under subsection V(A)(4); notify ADS in writing within one week of the execution of a contract to sell the property and include a copy of the contract.

VI. Claims Procedure

A. To be eligible for benefits under this Guarantee, the Owner must comply with the following claims procedure.

1. An Owner shall make a claim for benefits within 90 days of the closing of the sale of Property.

2. A Claim for benefits shall be filed with ADS and shall include a copy of a valid Guarantee Certificate, evidence of the Value of Sale and a report by an Appraiser demonstrating that the Loss in Value was directly attributable to the operation of the Expanded Landfill.

B. ADS may conduct its own Appraisal by an Appraiser to verify the Value at Sale and to determine the cause of any Loss.

ATTACHMENT E

ENVIRONMENTAL CONTINGENCY FUND

GUARANTY

This Environmental Contingency Fund Agreement (the "Guaranty") is made and entered into by and between McLean County, Illinois ("County") and ADS of Illinois, Inc. ("ADS") as part of the Host County Agreement (the "Agreement") with ADS to which this Guaranty is attached. This Guaranty is to be interpreted and constructed in a manner consistent with the Agreement and the defined terms contained in the Agreement are utilized in the construction and interpretation of this Guaranty. The Agreement is incorporated by reference herein.

In addition to the financial assurance requirements of the State of Illinois applicable to waste facilities of this type and kind, beginning on the Effective Date of the Agreement and continuing for a period of thirty (30) years subsequent to IEPA-certified closure of the Landfill or Expanded Landfill, whichever occurs later, ADS hereby agrees to provide up to $1 million in the event ADS breaches and fails to cure any of its obligations within such time limits as may be contained in the Agreement or as may be reasonably imposed by the County in a notice served upon ADS by the McLean County Health Department (the "Health Department") for the investigation and remediation of (a) any release or substantial threat of release of a substance defined as hazardous pursuant to Section 101 of the Comprehensive Environmental Response Compensation and Liability Act, 42 U.S.C., Section 9601, or pursuant to the Act and the regulations adopted thereunder ("Hazardous Substance") from the Landfill or the Expanded Landfill into the environment; or (b) any other conditions or occurrences subsequently caused by ADS' operations on the Landfill or the Expanded Landfill which create circumstances of substantial danger to the environment or to the public health, safety or welfare. Such notice from the Health Department shall include a copy of the investigation or, in the absence of a written investigation report, an adequate description of the factual circumstances at the Landfill or the

Expanded Landfill triggering ADS' obligation and/or remediation required to be performed by ADS and an opportunity for ADS to perform such remediation within a reasonable time. The County shall have the right to call upon ADS to perform this Guaranty, but only in the event that ADS fails, without legal cause rising to the level of a defense to an action brought by or on behalf of the United States Environmental Protection Agency or by the IEPA, to provide such remediation. The County shall have the right to obtain from the McLean County Circuit Court, in the Court's discretion, an Order allowing the County to call upon ADS to perform pursuant to this Guaranty for the purposes set forth herein.

The County's right to call upon this Guaranty shall be in addition to any enforcement rights the County may have under this Agreement.

IN WITNESS WHEREOF, the parties hereto have set their hands and seals.

Appendix C: 2017 Capacity Report, McLean County Landfill

ANDREWS ENGINEERING, INC.

March 27, 2017

Mr. John McIntyre
Chair of the McLean County Board
812 Karin Dr.
Normal, IL 61761

Re: 1130200042 – ADS/McLean County Landfill #2
McLean County
Host County Agreement – 2017 Capacity Report

Dear Mr. McIntyre:

On behalf of our client, American Disposal Services of Illinois, Inc., Andrews Engineering, Inc. (Andrews) has completed the Annual Capacity Report as required by the Host County Agreement. Appendix C of the Host County Agreement requires that three topographic maps be submitted along with the required text and calculations. Andrews performed a topographic survey at the facility on February 26, 2016 for the 2016 Illinois Environmental Protection Agency (EPA) Annual Capacity Report (Figure 1). An aerial survey of the facility was performed on December 27, 2016, and AEI used the information collected (combined with previous surfaces) to create the current waste surface (Figure 2). This waste surface was used for the 2017 Illinois EPA Annual Capacity Report. The final attached figure (Figure 3) is the current permitted top of waste, including the approved Horizontal Expansion. These surfaces and volumes have been calculated using the survey data and AutoCAD Civil 3D Desktop.

As required by both the Host County Agreement and the Illinois EPA Annual Capacity Report, the remaining air space permitted to receive waste has been calculated. This volume is 194,436 cubic yards. A copy of the Annual Capacity Report, which was submitted to the Illinois EPA, has been included with this correspondence. The amount of airspace consumed last year was also calculated. This volume was calculated using AutoCAD Civil 3D software, which compared the 2016 (February 26, 2016) topographic survey with the 2017 (December 27, 2016) aerial survey. The volume consumed for 2016 has been calculated to be 182,231 cubic yards. In addition, tonnage taken in for the year was obtained from facility records. The tonnage received between the two survey dates of February 26, 2016 and December 27, 2016 was 170,518 tons.

If you have any questions or require further information, please do not hesitate to contact me at (217) 787-2334. Thank you.

Respectfully yours,

Douglas W. Mauntel, P.E.

Appendix D: 2014 Waste Disposal Agreement between Republic Services, the City of Bloomington, and the Town of Normal

WASTE DISPOSAL AGREEMENT

This Agreement (the "Agreement") is made as of the 4th day of March 2014 by and between the City of Bloomington, Illinois, and the Town of Normal, Illinois, both Illinois home rule units of local government, (collectively "City"), and Republic/Allied ("Contractor").

Whereas, City requested proposals for the disposal of solid waste collected by City; and

Whereas Contractor submitted a proposal for the disposal of solid waste collected by City; and

Whereas City after reviewing all proposals submitted, determined that Contractor is best able to provide solid waste disposal services for City; and

Whereas the parties desire to reduce their understandings to writing; and

Now Therefore, in consideration of the terms, conditions, obligations and covenants contained herein the parties covenant and agree as follows:

SPECIFICATIONS:

1. Contractor will own/operate an appropriately licensed solid waste facility within a ten (10) mile radius of the intersection of Main and Division Streets, where the City of Bloomington and the Town of Normal adjoin, and accept Refuse for disposal with the exception of certain hazardous, special and other wastes as set forth later in this Agreement; and

2. The City will assume responsibility for the collection of Refuse generated within the City limits, and the City wishes to dispose of some or all of the Refuse generated within the City at the above referenced licensed solid waste facility.

3. **Performance by Contractor:**
The performance and obligations of Contractor hereunder shall be termed the "Work", shall include the following:

   a. **Acceptance by Contractor:**
   For the Consideration set forth in Exhibit A, Contractor shall accept for disposal, at its licensed solid waste facility all Refuse, as defined by the Bloomington City Code and Normal Town Code (the "Refuse"), collected by the City, its agents and employees which the City shall transport to the licensed solid waste facility subject to the exceptions set forth hereafter. The parties recognize that City shall not be obligated, but may deliver, in its discretion, to Contractor a portion or all of its Refuse collected by City. The Refuse may include solid waste collected from City-owned buildings, public litter receptacles, and all other items of whatsoever kind or nature. The Refuse may not include hazardous wastes as defined by Federal law, special

wastes as defined by the State of Illinois, white goods, tires, landscape waste, lead/acid batteries, asbestos containing materials, or any other materials which at this time or in the future may not be disposed in transfer stations or sanitary landfills pursuant to Federal or State statutes, rules or regulations. ("Excepted Waste"). Contractor retains the right to Refuse or reject after acceptance any loads containing Excepted Waste.

b. **Compliance with Laws:**
Contractor shall, during the term of this contract or any extensions or renewals thereof, fully comply with all Federal, State and local laws, statues, ordinances, rules and regulations which in any manner control, affect or relate to the Work or the ownership, operation and/or maintenance of a licensed solid waste facility in the State of Illinois, its operating permit, and the performances, obligations, operations or conduct of the Work hereunder, including all laws, statutes, ordinances, rules and regulations which are subsequently enacted. City shall have the right to request and receive verification from Contractor of its compliance with the provisions of this paragraph; to the extent Contractor is reasonably able to provide such verifications.

c. **Permits and Licenses:**
Contractor shall obtain and maintain all permits, licenses and approvals required by any regulatory or statutory authority which are necessary for it to fully perform the Work, including those required to own, operate and/or maintain the licensed solid waste facility.

d. **Operating Time:**
Contractor shall accept Refuse from the City at the licensed solid waste facility during the following days and times:

Labor Day to Memorial Day (Except Christmas Day) –
Monday through Friday - 7:00 AM to 3:30 PM & Saturday – 7:30 AM to 11:30 AM

Memorial Day to Labor Day -
Monday through Friday - 6:00 AM to 3:30 PM & Saturday – 7:30 AM to 11:30 AM

The parties acknowledge that the following days are holidays for employees of the licensed solid waste facility:

New Year's Day
Martin Luther King Day
Good Friday
Memorial Day
July 4th
Labor Day
Veteran's Day
Thanksgiving Day
Friday After Thanksgiving
Christmas Eve Day

Christmas Day
New Year's Eve Day

e. **Continued Operation:**
During the entire term of this contract, Contractor will maintain a licensed solid waste facility within a ten (10) mile radius of the intersection of Main and Division Streets. If due to an emergency situation unforeseen by the Parties, Contractor cannot dispose of solid waste at a licensed solid waste facility within a ten mile radius of the intersection of Main and Division Streets, then Contractor shall make arrangements for lawful disposal of solid waste during the period of the emergency situation at no additional cost to City.

f. **Indemnification:**
Contactor agrees to indemnify and hold the City harmless from and against any loss, damage, or claim (including reasonable attorneys' fees) resulting from or arising out of the negligent acts or omissions of Contractor in the performance of its obligations under this agreement.

4. **Performance by the City:**

a. **Delivery by City:**
City will deliver for disposal at the licensed solid waste facility Refuse collected by the City, its agents and employees during the term of this agreement, provided however the quantity and type of Refuse delivered to Contractor shall be in the sole discretion of City. All or a portion of Refuse collected may be delivered.

b. **Permits and Licenses:**
City shall obtain and maintain all permits, licenses and approvals required by any regulatory or statutory authority necessary for it to transport Refuse to Contractor, and will comply with the provisions contained within the Contractor's operating permit and all reasonable rules and regulations promulgated by contractor relating to receipt and disposal of Refuse.

c. **Compliance with Rules:**
City drivers will obey posted speed and traffic control signs. Refuse will be disposed of at the location and in the manner directed by the Contractor's managers or its supervisors.

d. **Indemnification:**
To the extent permitted by law, City agrees to indemnify and hold the Contractor harmless from and against loss, damage, or claim (including reasonable attorneys' fees) resulting from or arising out of the gross negligent acts or omissions of City in the performance of its obligations under this Agreement.

5. **Assignment:**

In the event that the City discontinues using its own employees to collect the City's Refuse and contacts for all such work with a third party, including the issuance of any franchise therefor, then the City shall assign this Agreement to such contractor or franchisee and shall require such contractor or franchisee to comply with all obligations contained in the Agreement during the remaining term thereof. In such event Contractor shall charge the City for all Refuse delivered by such contractor or franchisee at the same rate as set forth herein. Any such assignment shall not be deemed to be a cause to terminate this Agreement. The parties agree the City of Bloomington and the Town of Normal each retain the right to assign this agreement to a third party and assignment by one does not affect the validity of the agreement with regard to the non-assigning city or town. Contractor shall not assign this Agreement or any of the work described herein without the express written consent of the City and Town.

6. **Term:**

   a. This Agreement shall be for an initial period of two (2) years, commencing on March 1, 2014, and will be automatically renewed on an annual basis for up to five (5) additional periods of one (1) year each unless either party gives ninety (90) days written notice to the other prior to the expiration date of the original term or any renewal period. All terms, conditions, covenants and agreements set forth herein shall be applicable to any extension or renewal of this Agreement, except that the parties will negotiate in good faith mutually acceptable rates to be paid by the City during any renewal periods.

   b. This Agreement shall be subject to cancellation in the event either party is guilty of material breach of this Agreement; provided, however, that the Agreement may not be cancelled if the breaching party cures the breach within thirty days of receipt of written notice from the other party; provided further, if the breach is of such a nature that it is impossible to cure within such thirty day period, the Agreement may not be cancelled so long as the breaching party continues to diligently pursue a cure, unless such breach relates to the inability of Contractor to accept Refuse at the licensed solid waste facility as a result of the cancellation or suspension of its permit by the Illinois Environmental Protection Agency.

7. **Compensation:**

   a. In consideration for the Work, the City agrees to pay Contractor the appropriate rate set forth on Exhibit A for each ton of Refuse delivered to the licensed solid waste facility. The Rate shall apply regardless of whether the Refuse delivered by the City to Contractor is loose or compacted. City agrees that any delivery of Refuse by City to Contractor shall be deemed to be at least one (1) ton per vehicle.

   b. Whenever the licensed solid waste facility remains open past closing time solely because of a request of the City, the City shall pay Contractor an hourly rate set forth on Exhibit A for any actual time the facility remains open; provided,

however, that this charge shall not be applied if the reason the City requested the facility to remain open was to dispose of Refuse resulting from fires, floods, explosion, accidents, weather or Acts of God.

c. At no time during the term of this Agreement, including any renewal term, shall any fine or penalty entered against Contractor for any breach or violation of any Federal, State or local law, statue, ordinance, rule or regulation, be passed through to the City.

d. Contractor shall invoice the City and Town separately for Refuse delivered to the licensed solid waste facility, on a semi-monthly basis, for the total quantity of Refuse delivered to the facilities covered by this Agreement by city or town.

e. All invoices sent to the City, by the Contractor, shall be paid within thirty (30) days after approved by the City Council, provided, however, in the event of any dispute as to any invoice, the City will pay the amount that is not in dispute, and will undertake discussions and negotiation with Contractor to resolve any discrepancy or dispute in any invoice, and shall, upon resolution of any discrepancy or dispute, pay said agreed upon amount as soon as reasonably possible. In order to enable the parties to reach a resolution of any discrepancy or dispute, Contractor shall maintain records indicating, in sufficient detail, dates, truck numbers, amounts, tonnages, etc. including in each invoice and shall make available such records to the City in the event of any discrepancy or dispute concerning any invoice.

8. **Specific Performance:**
The parties hereto agree that substitute performance of the Work will be difficult or impossible to obtain without undue hardship or extreme expense to either party, and in the event Contractor or City fails or Refuses to perform the Work hereunder, the parties hereto agree that the other party has an inadequate remedy at law. Therefore, Contractor or City may be compelled to specifically perform the Work under this Agreement.

9. **Independent Contractor:**
It is understood and agreed that Contractor is an independent Contractor.

10. **Insurance:**
The parties shall maintain in full force and effect throughout the term of this Agreement the following types of insurance in at least the limits specified below:

Coverage	Minimum Limits of Liability
Workers Compensation	Statutory
General Liability	$1,000,000 combined single limit
Automobile Liability	$1,000,000 combined single limit
Environmental Liability for Third party Bodily Injury Or Property Damage Arising	$1,000,000

From Contractor's Cargo Due
To Upset, Overturn, or
Damage to vehicle

The parties shall provide one another with a certificate of insurance and shall keep this insurance in effect during the term of this Agreement; provided, in the event City uses its governmental powers to enter into a pooled insurance arrangement or self-funded insurance arrangement; such arrangement shall be deemed to be in compliance with the requirements of this section.

11. **Equal Opportunity:**
It is the affirmed policy of the City to encourage utilization of the community's human resources on an equal opportunity basis. The City requires all contractors and vendors doing business with the City not to discriminate against anyone on the basis of race, age, color, religion, gender, ancestry, national origin, marital status, mental or physical disability unrelated to ability, familial status or sexual orientation. To accomplish this result, all contractors doing or proposing to do business with the City will be required to submit on request an acceptable written affirmative action plan for the utilization of all available workers on an equal opportunity basis. Contractor hereby agrees, as a material part of the Agreement, to comply with the City of Bloomington Contract Compliance Program, Section I, Paragraph (3), titled "Equal Employment Opportunity".

12. **Notices:**
All notices to be given hereunder by either party shall be in writing and given by personal delivery or certified mail to the parties at the addresses as hereinafter set forth. For purposes of calculating time periods under the provisions of this Agreement, notice shall be deemed effective upon receipt or personal delivery, whichever is applicable.

13. **Governing Law:**
This agreement and the rights of the parties hereunder shall be governed by and interpreted in accordance with the laws of the State of Illinois.

14. **Other Refuse Collected:**
The City shall retain the right to dispose of "other" Refuse, spoil, bulky waste, leaves, grass, as is determined to be in the best interest of the City.

15. **Successors and Assigns:**
This agreement shall be binding upon and shall inure to the benefit of all successors and assigns of Contractor and City.

16. **Contractor Certifications:**
Contractor hereby certifies that the representations set forth on Exhibit B are true and correct and form a material part of this Agreement.

17. **RFP Documents:**
The request for proposals issued by City and the response provided by Contractor are attached hereto by reference and form a part of this Agreement.

18. **Entire Agreement:**
This Agreement supersedes all prior oral understandings and constitutes the entire agreement between the parties with respect to the subject matter herein.

19. **Severability:**
If any provision of this Agreement is held invalid by a court of law, the remainder of this Agreement shall not be affects thereby unless the invalidity of part substantially alters the business terms of the original Agreement.

20. **No Third Party Beneficiary:**
This Agreement is for the sole benefit of the parties and nothing herein is intended to confer upon any third party any legal or equitable right, benefit or remedy whatever under or by reason of this Agreement.

21. **Amendments:**
This Agreement may only be amended in writing signed by each party hereto.

22. **Delay No Waiver:**
No waiver by any party of any of the provisions hereof shall be effective unless reduced to writing and signed by the party so waiving. No delay or failure to exercise any right, remedy or power under this Agreement shall operate or be construed as a waiver.

IN WITNESS WHEREOF, the parties have executed this Agreement as of the date first written above.

RFP #2014-38 RESPONSE FORM

SOLID WASTE DISPOSAL SERVICES
FOR THE CITY OF BLOOMINGTON AND THE TOWN OF NORMAL

The offeror agrees to contract with the City of Bloomington and Town of Normal to provide all necessary labor, supervision, machinery, tools, apparatus, documents and any other means to do all the work and furnish all the materials specified in the proposal in the manner and time therein as set forth by the proposer and that the proposer will take in full payment the amount set forth hereon. The cost of all labor, material and equipment necessary for the completion of the proposed work, even though not shown or specified, shall be included in the total price for the various items shown herein.

We further agree to complete all of the above work in a complete, neat, and workmanlike manner. Payment of prevailing wage rates as predetermined by the Bloomington City Council pursuant to the Prevailing Wage Ordinance 2012-21 is acknowledged.

The offeror certifies by signature below that it has not been barred from contracting with a unit of State or Local government in the State of Illinois as a result of a violation of Section 33E-3 or 33E-4 of the Criminal Code of 1961, as amended.

DESCRIPTION	AMOUNT	
Solid Waste Disposal (3/1/2014 to 2/29/2016)	$ 46.46	per Ton
After Hours Operation (3/1/2014 to 2/29/2016)	$ 22.24	per hour - per person
Cost for Five (5) Year Period After expiration of Original Agreement		
Solid Waste Disposal (3/1/2016 to 2/28/2017)	$ 48.55	per Ton
Solid Waste Disposal (3/1/2017 to 2/28/2018)	$ 50.01	per Ton
Solid Waste Disposal (3/1/2018 to 2/28/2019)	$ 51.51	per Ton
Solid Waste Disposal (3/1/2019 to 2/29/2020)	$ 53.06	per Ton
Solid Waste Disposal (3/1/2020 to 2/28/2021)	$ 54.65	per Ton
After Hours Operation (3/1/2016 to 2/28/2017)	$ 23.25	per hour - per person

EXHIBIT B
Contractor Certification
For Services

Contractor on behalf of contractor, its principals, and owners with more than a seven and one half percentage interest in Contractor certifies that the following representations are true and correct and further agrees as a condition of doing business with the Town of Normal to require all of Contractor's subcontractors and sub-subcontractors to certify that the following representations are true and correct for each subcontractor and sub-subcontractor:

1. CONFLICT. Contractor certifies that no Town of Normal officer or employee has any interest in the proceeds of this contract.
2. BRIBERY. Contractor certifies that same has not committed bribery or attempted bribery of an officer or employee of any governmental official whether on the federal, state or local level.
3. DEBARMENT. Contractor certifies that same has not been barred from conducting business with any governmental unit whether federal, state or local.
4. SARBNES-OXLEY. Contractor certifies that the business entity its officers, directors, partners, or other managerial agents of the business have not been convicted of a felony under the Sarbanes-Oxley Act of 2002 nor have any of the same been convicted of any felony under state or federal securities laws.
5. BID RIGGING/BID ROTATING. Contractor certifies that same has not been barred from contracting with any unit of state or local government as a result of a violation of 720 ILCS 5/33E-3 (bid-rigging) or 720 ILCS 5/33E-4 (bid-rotating).
6. DELINQUENT PAYMENTS. Contractor certifies that same is not delinquent in the payment of any debt or tax due the State or the Town of Normal.
7. RECORDS. Contractor certifies that same shall maintain books and records relating to the performance of this contract as necessary to support amounts charged under the contract for a period of three (3) years from the later of the date of final payment under the contract or completion of the contract.
8. HUMAN RIGHTS ACTS. Contractor agrees to comply with applicable provisions of the Town of Normal Human Rights Ordinance, the Illinois Human Rights Act, the U.S. Civil Rights Act and the Americans with Disabilities Act.
9. NON-DISCRIMINATION. Contractor certifies that the same is an "Equal Opportunity Employer" as defined by Section 2000 (e) of Chapter 21, Title 42 U.S. Code Annotated and applicable Executive Orders.
10. DBE. Contractor certifies that same is or is not (please circle applicable designation) a Minority and Female Business Enterprise as defined by the State of Illinois (30 ILCS 575/et seq.)
11. PATRIOT ACT. Contractor certifies that same is in compliance with the Patriot Act and Executive Order 13224 and federal Anti-Money Laundering Control Act of 1986 as amended.

12. AMERICAN RECOVERY AND REINVESTMENT ACT. Contractor certifies that same is in compliance with and will continue to comply with the American Recovery and Reinvestment Act of 2009 when federal funds are used pursuant to this Act for the work undertaken by Contractor.
13. TAXPAYER IDENTIFICATION. Contractor certifies that its correct Federal Taxpayer Identification Number (Social Security Number or Federal Employer Identification Number) is _____.
14. To the extent required by Illinois law Contractor agrees to comply with the Illinois Freedom of Information Act and produce upon request public records of the Town of Normal held by such contractor all within the time allowed by law and subject to applicable exemptions allowed by law.

Contractor hereby agrees to defend, indemnify and hold harmless the Town of Normal its officers, employees and agents from and against any and all claims, damages, losses, risks, liabilities, and expenses (including reasonable attorneys' fees and costs) arising from or related to any breach of the foregoing representations and warranties.

MCLEAN COUNTY SOLID WASTE PROGRAM

2016 ANNUAL REPORT

ECOLOGY ACTION CENTER

THE ECOLOGY ACTION CENTER HAS COMPLETED THE FOLLOWING ITEMS IN FULFILLMENT OF THE SOLID WASTE AND WASTE REDUCTION EDUCATION PROGRAM AGREEMENT OF JANUARY 1, 2014.

LEADING INDICATORS: SUMMARY OF PROGRESS[1]

Goal: *Visit **70%** of eligible classrooms in McLean County, Bloomington, and Normal for elementary school recycling and waste reduction education programs. Reaching this target means directly engaging with approximately 1,500 students.*

- ☑ There are 90 Fourth grade classrooms in McLean County, which includes all public and private schools. ***In 2016, we made visits to 89 4th grade classrooms, and reached 2,221 people.*** *While this figure seems to indicate that we visited virtually all 4th grade classrooms, we actually visited some teachers in the spring of 2016 and again in the fall of 2016. Those teachers would be counted twice, but they had different students in the fall.* **Goal exceeded.**

Goal: *Visit **60%** of public libraries within McLean County, Bloomington and Normal and provide a summer reading program on recycling and waste reduction topics. Reaching this target means directly engaging with approximately 300 library patrons.*

- ☑ We visited 9 of the 14 public libraries in McLean County in the summer of 2016, and educated 379 people. This represents **64%**, which exceeds our goal.

Goal: *Provide recycling and waste reduction education programs at **80%** of after school programs, reaching approximately 200 students. This year's target group includes 8 after school programs.*

- ☑ In 2016, we visited 8 after school programs with a total of 421 students. We reached **100%** of targeted schools; goal exceeded.

Goal: *Provide recycling and waste reduction presentations for **25** local groups or approximately 750 individuals including civic groups, scouts, preschools, non-target school groups, university classes.* [2]

- ☐ In 2016, EAC staff presented **20** programs for these qualifying groups to 491 people. Goal not reached due to presentations to community groups on other EAC program topics.

Goal: *Promote recycling and sustainable practices to direct audiences utilizing social media channels including Facebook, Twitter, LinkedIn, and YouTube with a target of **30,000** interactions annually.*

- ☑ In 2016, our social media posts resulted in **71,711** interactions, representing 239% of our goal.

[1] The totals below represent Year-To-Date numbers. Specific details of this Quarter's activities are described on the pages that follow.
[2] In practice the EAC provides these programs for nearly 100% of those requesting the services.

Goal: *Provide and promote comprehensive online resources on recycling and waste disposal for Bloomington, Normal, and McLean County with a target of* ***12,000*** *visits to these pages annually.*

☑ Estimated YTD totals: **35,027** visits, which exceeds our goal.

SOLID WASTE MESSAGING:

2016 TOTAL REACH: 405,182 INTERACTIONS

DIRECT (PROGRAMS, EVENTS, PHONE INQUIRIES): 18,444
MEDIA (NEWSPAPER, RADIO, SOCIAL MEDIA, WEB): 386,738

LAGGING INDICATOR

As the main goals of the McLean County Solid Waste Program are to increase recycling while increasing source reduction, the annual measurement and reporting of these rates by the EAC can act as lagging indicators of the success of outreach efforts. However, the value of this performance indicator is also limited by other factors impacting recycling and waste generation rates, such as accessibility of recycling programs and macroeconomic forces. While quantifying source reduction of municipal solid waste is problematic, tracking recycling rates is much more reliable. Per the 2012 Five Year Update to the McLean County Integrated Solid Waste Management Plan, the county-wide recycling rate goal is currently set at 40%, which will also serve as the EAC's target for purposes of this indicator.

The 2015 recycling rate fell by 1.2 percentage points from 2014 to 36.5%. At less than 0.1% variation from the average of the recycling rate average during past nine years, this is understood to represent no significant change.

HOUSEHOLD HAZARDOUS WASTE (HHW) COLLECTION

- Initiated planning for fall 2017 Household Hazardous Waste Collection early due to significant changes in host site availability. Spent several months negotiating access to multiple possible alternative event locations.
- Negotiated potential major sponsorship from a locally based organization.

SOLID WASTE COORDINATOR ACTIVITIES

- Ongoing efforts in development of a new twenty-year McLean County Integrated Solid Waste Management Plan. Extensive research conducted into solid waste management strategies prior to the creation of three focus groups to brainstorm and prioritize strategies. Led twelve collaborative discussions towards group consensus on possible strategies for inclusion in the draft solid waste plan. Stakeholder groups formed and will meet in early 2017 to address a few remaining key issues before drafting the proposed new solid waste plan.
- Hosted state-wide e-waste meeting for Illinois electronics waste recycling working group.

- Facilitated quarterly Solid Waste Technical Committee Meetings including updates on solid waste planning process.
- Reviewed multiple solid waste permit applications from Illinois EPA on behalf of McLean County.
- Working towards implementation of new online recycling and waste database application to facilitate even easier distribution of information on local recycling programs.
- Two staff members attended the Illinois County Solid Waste Management Association annual conference.
- Solid Waste presentation given to Bloomington's City Council on current solid waste plan efforts, EAC solid waste outreach program reach, and estimated lifespan of the current McLean County Landfill.
- Coverage by multiple media outlets (WGLT, WMBD) of declining landfill capacity and EAC's solid waste plan efforts.
- Participation in ongoing efforts with the Illinois Product Stewardship Council to improve e-waste recycling regulations.

COMMUNITY-WIDE WASTE GENERATION AND RECYCLING RATE

- Surveyed area waste haulers, recyclers, municipalities, and institutions to gather data for calculation of county-wide 2015 municipal solid waste generation rate and recycling rate.
- 91,866 tons of municipal solid waste were recycled in McLean County in 2015, representing more waste materials recycled than any time in the past six years. Unfortunately, total waste generated and landfilled also increased resulting in a minor decline in the overall recycling rate relative to waste generated. **The 2015 recycling rate fell by 1.2 percentage points from 2014 to 36.5%. At less than 0.1% variation from the average of the recycling rate average during past nine years, this is understood to represent no significant change.**
- **McLean County remains fairly close to the community-wide recycling goal of 40%.** This goal is established within the McLean County Integrated Solid Waste Management Plan, which is updated every five years. **However, with the rate showing no measurable progress in nine years, it is now evident that additional measures are critical for any improvement.**
- In addition to striving to meet the established goal, making additional progress in source reduction and further increased recycling is becoming increasingly important as it is estimated that one year of capacity remains in the McLean County Landfill. Upon closure of the landfill, waste will need to be transported farther from Bloomington-

Normal, which is anticipated to increase costs. Delaying the inevitable landfill closure through more assertive waste management strategies can help conserve local financial resources.

- **Other K-12 School activities:**
  - Solid waste reduction and recycling programs for
    - Pepper Ridge Family Reading Night (2 presentations, 85 participants)
    - Unit 5 High Schools (2 programs, 42 participants)
    - Calvary Christian Daycamp (1 program, 14 participants)
  - Recycling programs featuring clip for movie "Wall-E" and games at 8 elementary school After School Programs: Grove, Oakdale, Colene Hoose, Sugar Creek, Glenn, Parkside, Fairview & Prairieland (8 programs, 421 participants)
  - Participated in "Earth Run" organized by Normal Community High School students; gave presentation to runners; proceeds to benefit the EAC.
- **Preschool Garbage Monster Presentations:**
  - Waste Reduction/Recycling program for Mulberry School (2 presentations, 53 participants)
- **Scout activities:**
  - Program for Brownie Scouts from Hudson (1 program, 10 participants)
  - Program for Scouts (1 program, 10 participants)
  - Program for Scouts at EAC (1 program, 9 participants)
- **University Programs:**
  - Presentation for ISU Student Environmental Health Association (45 participants)
  - Presentation for two Environmental Sciences classes at Illinois Wesleyan (42 participants)
- **Community solid waste reduction programs and information booths:**
  - Booth at Sugar Creek Arts Festival, plus distributed refillable bottles to artists (173 people)
  - In partnership with Midwest Fiber offered food waste composting and recycling at Sweet Corn Blues Festival along with an information booth (1,075 booth visitors)
  - Participated in Wellness Fairs at Country/Growmark/IAA (2 events, 186 people)
  - Solid waste reduction and recycling program for St John's Lutheran group (53 participants)
  - State Farm Earth Day event (3 events, 120 people)
  - City of Bloomington Health Fair (70 people)
  - Participation in Downs Community Breakfast event with booth about recycling (10 participants)
  - Information booth at David Davis Glorious Garden Fest (2 days, 219 people)
  - Light the Night event in Uptown Normal (26 people)

- Information booth at ISU Wellness Fair (39 people)
- Information booth at ISU Horticulture Center Autumn Fest (20 people)
- Booth at McLean County Chamber of Commerce non-profit showcase (220 people)
- Connect Transit Employee Health Fair

- **Library Programs:**

  "The Lorax" presentation, including information about waste reduction and composting, at Bloomington Library (42 participants), Normal Library (21 participants), Colfax (13 participants), Danvers (10 participants), Heyworth (55 participants), Hudson (46 partifcipants), LeRoy (85 participants), McLean (62 participants), and Towanda (45 participants).

- **Other Programs:**
  - Presentation at PEO Club (35 participants) with emphasis on waste reduction
  - Recycling and waste reduction program co-sponsored by Mid Central Community Action
  - Program for Daybreak Rotary group covering many solid waste topics (15 participants)
  - Presentation at Westminster Village (30 participants) with emphasis on waste reduction
  - Program for University Club – 16 people

OTHER ACTIVITIES

- Produced four quarterly EAC paper newsletters featuring solid waste issues among other topics. Mailed each issue to approximately 270 households.
- Sent monthly issues of the EAC Action News email newsletters to over 900 email addresses to promote general recycling and waste reduction; issues were also targeted to timely events such as HHW, recycling, vermicomposting and more.
- Promoted waste reduction, recycling, composting and proper disposal of household hazardous wastes through social media. EAC posted messages on its Facebook, Twitter, LinkedIn, and YouTube accounts on solid waste topics, with a resulting 71,711 views of these posts.
- Answered 802 phone calls and other inquiries about the disposal of household hazardous waste and recycling.
- Received 35,027 to solid waste, recycling, and hazardous waste related pages within EAC's website.
- Administration and promotion of McFreecycle, a free listserv on the internet for the free exchange of materials in McLean County to avoid disposal of useable items. (2,082 current members with an average of 198 messages exchanged monthly).
- Awarded the annual McLean County Green Awards in June. The McLean County Waste Reduction and Recycling Award recognized The Bloomington-Normal Marriott. The McLean County World of Difference Award was presented to General Manager Jeff Pritts of the Bloomington-Normal Marriott.

- Co-sponsored the Illinois Sustainable Living and Wellness Expo (ISLWE) at IWU – 3000 participants. This year's event was purposefully designed to model "zero-waste" event planning: much of the literature was presented electronically instead of paper hand-outs, and vendors were encouraged to not distribute extraneous trinkets. Event was publicized on WJBC and WGLT, with advertisements and interviews, reaching nearly 50,000 area residents.
- Promoted and participated in Bloomington-Normal Clean Up Day in April, removing trash from a 1.6 mile stretch of Sugar Creek from Tipton Park to Audubon Gardens; Clean-Up Week was promoted on WGLT interview and through social media posts and paid advertisements.
- Promoted nontraditional recycling programs through annual America Recycles Day Mega Recycling Event in partnership with Illinois Wesleyan University in November. Over 415 households recycled thousands of pounds of electronics, textiles, paper (shredded), and miscellaneous items including eyeglasses, hearing aids, plastic shopping bags, mattresses and Terracycle items. Each participant was given local listings for recycling these items anytime throughout the year.

- Executive Director was interviewed on WGLT concerning America Recycles Day and next year's plans for Household Hazardous Waste collection event. Approximately 5,000 listeners. Also had coverage for America Recycles Day event on WJBC and in Pantagraph.
- Held MEGA Recycling event in conjunction with the Illinois Sustainable Living and Wellness Expo at IWU in April. Over 200 households recycled electronics, textiles, Terracycle items, and corrugated plastic signs; participants were given information about recycling these items in our community throughout the year.
- EAC sponsored Earth Day on WJBC resulting in extensive coverage with hourly spots and an extensive live interview on both WJBC and WBNQ covering many solid waste topics; over 25,000 listeners.
- Executive Director was guest on pre-Earth Day edition of WGLT's "Sound Ideas" with topics including solid and hazardous waste. Approximately 5,000 listeners. Followed up with Earth Day promotional underwriting spots on WGLT.
- Full page ad in The Pantagraph on Earth Day listing the many resources the EAC provides to our community, including information about solid waste, recycling, and household hazardous waste.

- June interview on WGLT's Sound Ideas regarding solid waste planning process, recycling rate, landfill closure, and recycling Q&A.
- June interview on WJBC about recycling rate and other waste issues.
- Held six build-your-own composter workshops with a total of 19 participants making bins to use at home and receiving full instruction on best composting practices.
- Loan of special event recycling containers to Boy Scouts for May events and IWU for graduation events.

Appendix F: 2016 McLean County Waste Generation and Recycling Rate

PRESS RELEASE
For immediate release
June 26, 2017

Phone: (309) 454-3169 x.11

2016 McLean County Recycling Rate Exceeds 10-year old Goal

While total volumes of waste recycled and waste generated decreased in 2016 in McLean County in comparison to 2015 rates, the community finally met a long-standing recycling rate goal. Nearly 42% of municipal solid waste generated in McLean County in 2016 was recycled; this is the first time the county reached the 40% community-wide recycling since increasing the goal in 2007. The 40% goal was set to continue to drive improvements in local recycling programs after the county met state mandated recycling goals of 15% and 25%.

Action by the City of Bloomington and Town of Normal to contract with Henson C & D Recycling to recycle "bulky waste" or large items such as old furniture or materials from remodeling projects was a key factor in reaching the 40% recycling goal. Previously all of these items were landfilled; starting in April 2016, the materials were recycled through the construction and demolition recycling facility owned and operated by Henson Disposal. This resulted in a significant jump in the recovery rate of these materials from approximately 4% to an estimated 21%.

	2012	2013	2014	2015	2016
Total MSW Recycled (tons)	66,737	73,833	85,196	91,866	73,760
Total MSW Landfilled (tons)	116,290	121,991	141,068	159,989	103,459
Total Municipal Solid Waste Generated (tons)	183,079	195,824	226,264	251,855	177,219
Percent Change from Previous Year	*-12.0%*	*7.0%*	*15.5%*	*11.3%*	*-29.6%*
Recycling Rate	**36.5%**	**37.7%**	**37.7%**	**36.5%**	**41.6%**
Percent Change from Previous Year	*6.7%*	*3.3%*	*0.0%*	*-3.2%*	*14.1%*

With less than one year of capacity left in the McLean County Landfill, more assertive strategies can make waste management more cost-effective in the long term. The Ecology Action Center is currently completing an entirely new waste management plan for McLean County, the City of Bloomington, and the Town of Normal. This plan

will outline strategies to further increase recycling and waste reduction for the next two decades.

The Ecology Action Center annually collects waste and recycling data to calculate the amount of municipal solid waste generated and recycled for all of McLean County as a lagging indicator of the impact of local recycling and outreach programs. Among other services, the EAC acts as the solid waste agency for Bloomington, Normal, and McLean County and provides technical assistance, recycling promotion, nontraditional recycling program administration, household hazardous waste coordination, education and outreach.

Information on residential recycling, recycling of nontraditional materials, and information on disposal of household hazardous wastes is available by calling (309) 454-3169 or visiting ecologyactioncenter.org.

The Ecology Action Center is a not-for-profit environmental agency with a mission to inspire and assist residents of McLean County in creating, strengthening and preserving a healthy environment. The EAC acts as a central resource for environmental education, information, outreach, and technical assistance in McLean County.

# # #

Appendix G: Plan Review Process

The formal review process of this plan began at the August 30, 2017 meeting of the McLean County Solid Waste Technical Committee. A unanimous vote to recommend the vote for approval was made by representatives of the City of Bloomington, the Town of Normal, McLean County Building and Zoning, McLean County Administration, McLean County Health Department, and McLean County Regional Planning Commission.

Per the Illinois Solid Waste Planning and Recycling Act Section 5. (c):

> *Prior to adoption by the governing body of the county, the county shall submit copies of the proposed plan for review and comment to the Agency, all municipalities within the county, all areawide planning agencies and the county health department. The county shall also make the proposed plan available for public review and comment. The period for review and comment shall be 90 days. The county shall hold at least one public hearing on the proposed plan during this period. The plan subsequently submitted to the governing body of the county for adoption shall be accompanied by a document containing written responses to substantive comments made during the comment period.*

Informational presentations on the plan were made to multiple public agencies including:

- McLean County Land Use Committee (September 7, 2017)
- Normal Town Council (October 2, 2017)
- McLean County Regional Planning Commission (October 4, 2017)
- Bloomington City Council (October 9, 2017)

Copies of the plan were distributed to all other municipalities in McLean County:

Anchor
Arrowsmith
Bellflower
Carlock
Chenoa
Colfax
Cooksville
Danvers
Downs
Ellsworth
Gridley
Heyworth
Hudson
Leroy
Lexington
McLean
Saybrook
Stanford
Towanda

A copy of the plan was sent to the Illinois EPA for review and comment on November 16, 2017. No feedback has been received as of December 21, 2017.

ECOLOGY ACTION CENTER

solid waste plan draft

Michael Brown <mbrown@ecologyactioncenter.org> Thu, Nov 16, 2017 at 11:21 AM
To: Ellen Robinson <ellen.robinson@illinois.gov>

Ellen,

Please find the pdf of the proposed 20-Year Materials Recovery and Resource Management Plan for McLean County, Bloomington, and Normal, Illinois on our website at https://ecologyactioncenter.org/wp-content/uploads/2017/09/2017%20ISWMP%2010.3.17%20HD.pdf. We are midway through the mandated 90-day public comment period for this new solid waste plan. Per the Illinois Solid Waste Planning and Recycling Act, I request any feedback from the Illinois EPA on the proposed plan at this time. Public comment ends at the beginning of the new year at which point the local approval process of the plan will take place. Any feedback that we can incorporate prior to that approval would be appreciated.

Thank you,

Michael

This 20-Year Solid Waste Management Plan is available for review at the McLean County Clerk's Office in Room 102, Government Center, 115 E. Washington St., Bloomington, IL and on the McLean County website at http://www.mcleancountyil.gov/

Appendix I: Public Hearing Testimonies

Minutes of the Land Use and Development Committee Meeting

The Land Use and Development Committee of the McLean County Board met on Thursday December 7, 2017 at 3:30 p.m. in Room 400, Government Center, 115 E. Washington Street, Bloomington, Illinois.

Members Present:	Chairman Erickson, Members, Wollrab, Wendt, Beard, and Scritchlow
Members Absent:	Member Johnson
Other Board Members Present:	None
Staff Present:	Mr. Bill Wasson, County Administrator, Mr. Don Knapp, Assistant County Administrator, Ms. Jessica Woods, First Assistant State's Attorney , Civil, Ms. Diana Hospelhorn, Recording Secretary
Department Heads/ Elected Officials Present:	Mr. Phil Dick, Director of Building and Zoning,
Others Present:	Mr. Michael Brown, Director of Ecology Action Center

Chairman Erickson called the meeting to order at 3:33 p.m. He presented the Minutes from the Land Use and Development Committee for the November 2, 2017 meeting. He asked for any additions or corrections.

> Motion by Cavallini/Beard to recommend approval of the November 2, 2017 Land Use and Development Committee Meeting.
> Motion carried.

Chairman Erickson presented the bills from November 30, 2017, which have been reviewed and recommended for transmittal to the Land Use and Development Committee by the County Auditor. The prepaid total and fund total for November 30, 2017 is $859.50. He asked for any objections to the bills.

COMMITTEE CHAIRMAN

> Motion by Scritchlow/Beard to recommend approval of the November 30, 2017 Land Use and Development Committee bills.
> Motion carried.

Chairman Erickson stated that the first item for action is the request by April and John C Becker for a waiver of preliminary plan requirements and a one-lot subdivision final plat for the April subdivision, file No. S-17-05.

Mr. Phil Dick, Director of Building and Zoning presented a pictorial, referring to the aerial phot of the April Subdivision. He presented information regarding the one-lot parcel located at 9321 N 150 East Road, in Stanford. The parcel contains a dilapidated single-family residence and land in crop production. The applicants plan to build a new single-family residence. They have obtained a plat access certificate from the Allin Township Road Commissioner. Mr. Dick advised that the County Engineer and Health Department, and Staff all recommend approval of the request.

> Motion by Wendt/Cavallini to recommend approval of the request by April and John C Becker for a waiver of preliminary plan requirements and a one-lot subdivision final plat for the April subdivision, file No. S-17-05.
> Motion carried.

Chairman Erickson presented the request by Michael Cone for a waiver of preliminary plan requirements and a one-lot subdivision final plat for the Cone Subdivision, File S-17-06.

Mr. Dick advised that the 2.56 acre parcel is located at 34937 E 2800 North Road, Chenoa, IL in Yates Township. The parcel currently contains a single-family residence, a barn, three machine sheds and an access easement. The applicant will need to obtain a plat access certificate from the Yates Township Road Commissioner. Mr. Dick advised that the County Engineer and Health Department, and Staff all recommend approval of the request. Mr. Tom Jennings represents the applicant and is here if the Committee has any questions.

> Motion by Wendt/Wollrab to recommend approval of the request by Michael Cone for a waiver of preliminary plan requirements and a one-lot subdivision final plat for the Cone Subdivision, File S-17-06.
> Motion carried.

Chairman Erickson continued with the request by Miller Rental, LLC, for a waiver of preliminary plan requirements and a two-lot subdivision final plat for the Miller Storage Subdivision, File S-17-07.

Mr. Dick stated that the two-lot parcel is located at 2717 N Main Street, Normal, IL. Lot 1 is 4.1 acres and currently contains a self-storage facility. Lot 2 is 15.99 acres, and is currently vacant, and in crop production. The applicant wants to separate the Miller Storage Facility units from the other property. Mr. Dick advised that the County Engineer and Health Department, and Staff all recommend approval of the request.

> Motion by Wendt/Scritchlow to recommend approval of the request by Miller Rental, LLC, for a waiver of preliminary plan requirements and a two-lot subdivision final plat for the Miller Storage Subdivision, File S-17-07.
> Motion carried.

Mr. Erickson presented the request by Chuck and Brenda Hinrichsen for a waiver of preliminary plan requirements and a one-lot subdivision final plat for the G. St. Clair subdivision 2nd Addition, file No. S-17-08.

Mr. Dick advised that the 1.14-acre parcel Is located at 837 E 2150 North Road, Danvers. The parcel currently contains a single-family residence and a barn. The applicant wants to set aside the farm dwelling. The applicant has a plat access certificate from the Downs Township Road Commissioner. Mr. Dick advised that the County Engineer and Health Department, and Staff all recommend approval of the request.

> Motion by Wendt/Cavallini to recommend approval of the request by Chuck and Brenda Hinrichsen for a waiver of preliminary plan requirements and a one-lot subdivision final plat for the G. St. Clair subdivision 2nd Addition, file No. S-17-08.
> Motion carried.

Chairman Erickson presented the Public Hearing for the Twenty-Year Solid Waste Plan for McLean County – The Ecology Action Center. He stated that Public notice of this hearing for the Twenty-Year Materials Recovery and Resource Management Plan for McLean County, Bloomington and Normal was published in the Pantagraph on November 18, 2017 as provided by law. The 90-day comment period on the plan began on October 5, 2017 and concludes on January 4, 2018. Chairman Erickson declared the Public Hearing for comment open at 3:37 p.m.

Mr. Don Knapp, Assistant County Administrator directed the public on the time they would be given to address the Committee. He stated that if public comment could not be completed in the next hour, the Public Hearing will be continued until Land Use and Development Committee's next meeting on January 4, 2018.

Chairman Erickson asked Mr. Michael Brown, Director of the EAC, to come to the table for any possible questions or comments.

Chairman Erickson directed the public to please sign in and state your name and address.

Ms. Ann Nadakavukaren, 9452 Deer Ridge Drive, Bloomington is representing the League of Women Voters. She stated that the League is concerned about the impact that solid waste has on air, land and water. The League of Women Voters of McLean County is an advocate for and integrated solid waste management strategy that encourages a regional approach to insure maximum waste reduction, adequate disposal capacity and a recycling reuse program for the entire community. The League of Women Voters is pleased to support the proposed 20 Year Materials Recovery and Resource Management Plan for McLean County. She advised that as the Government explores options for replacing lost revenue, the League points out that all of us are currently paying for disposal, a wasteful practice that is not the best for the environment. Choosing to spend more dollars on waste reduction and recovery is the best approach for the environment, and us now and for the future.

Ms. Cassie Metz, 808 S Linden, Normal, IL is an ISU Environmental Health Major. She supports the new plan especially for the implementation of recycling at the commercial apartment buildings. She advised that when recycling:

- not as many virgin materials are needed
- recycling reduces greenhouse gas emissions
- Hauling waste to a different landfill uses more fuel
- Recycling saves resources.

Ms. Metz referred to page 5 of the plan "Implementation should be managed to achieve the maximum net positive economic impact." She advised that surveys revealed that students do not have access to local recycling or the choice to recycle. It is inconvenient for students to use drop off locations because most students do not have cars. Ms. Metz believes that recycling should be a right. Many millennials are concerned about lowering our greenhouse gas emissions, conserving resources and in

general climate change. Students should not have to go out of their way to harm our environment less.

Mr. Chris Coulter, 5434 W. Stonebridge Court, Peoria, IL is the vice president of Area Disposal Service, Inc. He provided the history of his family owned waste hauling and recycling business for municipalities, commercial and industrial. He owns and operates two landfills to serve the region, Clinton Landfill and Indian Creek Landfill in Tazewell County. The American Disposal Service Landfill in McLean County has 700,000 cubic yards of capacity remaining. The combined disposal capacity of the Clinton and Indian Creek Landfill is over 72,000,000 cubic yards. Mr. Coulter advised that during the 20-year planning period, his facility would be able to accommodate the disposal needs for McLean County. He served as a member of the focus groups that helped to develop the 20-year plan. He is in support of and encourages approval of the proposed 20 Year Plan. Mr. Coulter referred to page 20 of the Plan, "The establishment of additional waste transfer stations could have multiple economic benefits including increased competition therefore more beneficial waste disposal rates or the possibility of new host agreements providing host fees as a new revenue source." Without this language any company wanting to develop a transfer station recycling center in McLean County, would have to go through a local citing approval process with the County or Municipality including nine criteria that have to be satisfied in order for a facility to be approved. Criteria 8 of Section 39.2 of the plan states, "If the facility is to be located in a County where the County has adopted a solid waste management plan, the facility is consistent with the plan." He noted that this is why the language in the proposed pan is critical. Mr. Coulter reiterated his support and approval of the 20 Year Plan.

Mr. Bob Broad, 306 W. Virginia Ave, Normal, IL a property owner and landlord stated that he believes the stakeholders involved in the focus groups was a valid representation of the needs of the County as a whole. He is in support of the 20 Year Plan, which lays out the County's current difficult situation with the near future closing of the landfill. The plan also lays out very simple, common sense strategies. Mr. Broad stated that as a property owner and landlord he supports the plan because: not all tenants recycle. The Plan will help educate people on the importance of recycling, give them more opportunities to recycle and possibly make recycling obligatory or at least a recycling bin obligatory. Passing a law to require recycling does not infringe on our freedom. He advised that sometimes we do need Ordinances to steer the County in the direction it needs to go. Voluntary measures are a great strategy; secondarily when necessary we pass laws. This is what we need to do in looking to the future.

William Gustavson, 1323 W Mulberry, Bloomington, IL stated that he hopes that we do not need this plan in twenty years. He stated that in Germany people are charged per pound for solid waste. If this were the case, people would be separating what needs to be recycled from solid waste.

Mr. James Gauhst, 1006 Samantha Street, Normal, IL is an ISU graduated. He stated that after graduation he continued to live in Normal. Having lived here, he sees what

happens when the students move out of the dorms and apartments, pointing out the waste this creates. Many of these materials can be reused of recycled instead of ending up in the landfill. The community can be better served by focusing on efficient ways to reuse or recycle. The waste management plan is a step in the right direction in the interest of sustainability.

Mr. Wesley Ward, 700 N. Adelaide, Normal, IL stated that he is in support of the proposed waste management plan. With the imminent closure of the landfill, most of our waste will be shipped across County lines. The plan cannot replace the lost revenue. It does put us on a path to a sustainable future. He addressed multifamily housing. Mr. Ward noted that the universities are bringing people to Bloomington – Normal to stay. Those people do not know a world of not recycling. Many of these young people lack transportation. Mr. Ward presented over 3,000 signatures from students requesting these changes. They want recycling. Please support this waste management plan.

Ms. Sarah Keene, 1014 ½ E Grove Street, Bloomington, IL is a student at ISU and a mother of two. Her children are being taught in school how to recycle, encouraged to recycle and coming home and teaching parents how to recycle. When they get older, there are not many recycling options in the city. Many businesses do not have recycling options. Starbucks and OSF do not recycle because there is no reason to recycle. There is no push from the City to recycle. Passing this plan will encourage our businesses and our children to recycle.

Chairman Erickson asked if there were any other comments from the public. Hearing none, he closed the Public Hearing at 4:10 p.m. He thanked the public for their comments and assured them that their comments will be taken under consideration. He appreciates them getting involved in the democratic process.

Chairman Erickson continued with the Items for Information, McLean County Reliability Project for Ameren Illinois.

Ms. Jamie Stone, Ameren Illinois, distributed the recommended routes for the construction of a new, approximately 10-mile 138,000-volt transmissions line and associated facilities to improve energy reliability to local customers. The new line will connect the existing McLean County Substation and the upgraded Normal East Substation located near Normal, Illinois. The new line and associated facilities are needed for Ameren Illinois to improve energy reliability and to support continued growth in the area. The project is proposed to be in service by December 2020.

Chairman Erickson presented County Positions Fill report from October 25 to November 27, 2017.

Mr. Wasson reported that there were no positions filled under the purview of the Land Use Committee.

Chairman Erickson advised that the next Land Use and Development Committee Meeting will be January 4, 2018 at 3:30 p.m.

Chairman Erickson asked if there was any other information to come before the Committee.

> Motion by Cavallini/Scritchlow to adjourn the December 7 2017 Land Use and Development Committee.
> Motion carried.

Chairman Erickson adjourned the Land Use and Development Committee Meeting without objection at 4:10 p.m.

Respectfully Submitted,

Diana Hospelhorn
Recording Secretary

support for the 20 year plan

Kay Moss [redacted] Fri, Nov 10, 2017 at 7:04 PM
To: mbrown@ecologyactioncenter.org

Good evening, Mr. Brown.

Thank you for your efforts to reduce the waste in McLean County. I've read through the Ecology Action Center's 20-year plan and I'm happy to support it.

Over dinner tonight, my husband and I discussed some of the surprises in the plan. We were bewildered that apartment buildings, commercial businesses, and construction companies aren't provided recycling options. We live in a subdivision with a lot of new housing construction. We've watched dumpster after dumpster of construction waste get hauled away, with no effort at any recycling.

Please count me as a supporter of the waste management efforts and your comprehensive, clearly written 20-year plan.

Thank you for all you are doing for our community, Mr. Brown.

Solid waste plan comment

Michael Matejka [redacted] Fri, Nov 10, 2017 at 3:00 PM
To: mbrown@ecologyactioncenter.org

TO: McLean County Clerk
c/o Michael Brown, Ecology Action Center

As someone who remembers hauling newspaper and glass to the occasional recycle days by Illinois State University in the early days of Operation Recycle, I appreciate how far our communities and our county has come toward reducing solid waste, particularly with municipal home recycling pick up. It is a great service and my family is very conscientious about recycling.

With our land fill expiring and the communities facing even more expensive haulage fees to transport solid waste out of the county, it is time for a more aggressive and thorough recycling plan. Whether through municipal ordinance or county government, I would highly urge that programs be developed, and if necessary, be required for recycling of construction materials and that recycling be made available to multi-family apartment and other residential occupants. Increased education for home owners is also imperative, particularly if residents can learn that not recycling can increase their tax bills dramatically, particularly if we have to haul waste out of town.

Thank you for reading this and I trust this will be submitted to the McLean County clerk in an appropriate format.

Mr Brown.

I support the proposed 20-year solid waste plan. We need to take steps to reduce our garbage since we now must send it to Pontiac's landfill. The plan seems to make reasonable suggestions on how we can make a significant difference in the amount of recycling we are able to do. I'm especially excited about the possibility of construction waste being recycled. I've talked to a number of apartment dwellers and they have told me that they wished that recycling was available at their buildings. If we can facilitate that, it could help a great deal.

Solid Waste Plan Public Comment

Julie Kistler [redacted] Mon, Nov 13, 2017 at 8:19 PM
To: mbrown@ecologyactioncenter.org

Hello, Mr. Brown.

I'm writing to offer my strong support for the 2017 20-year waste management plan. I am a Bloomington resident and I do my best to recycle as much as I can. On a recent drive through the ISU campus, I saw students holding signs to express their frustration wth the lack of recycling options in apartments and dorms here. I was shocked to learn they didn't get bins for that automatically. And now I understand that there are imminent challenges, as the McLean County Landfill is full and we will need to "export" our refuse and give up the fees earned from taking in waste from other areas. Obviously, these issues are complex. But the 2017 plan is the best option.

Thank you for your consideration of my opinion. I appreciate the chance to express it!

I fully support the 20 year waste management plan the EAC has proposed. This is an issue that needs to be addressed oon given the imminent clo ure of the landfill, the lagging participation in recycling, the co t of hipping wa te el ewhere, and the inevitable increase in solid waste generated by construction which will follow the inevitable increase in population. The plan is a modest proposal that addresses an issue that everyone who lives in McLean county should feel a a stake in.

Solid Waste Plan public comment

Sarah Lindenbaum [redacted] Mon, Nov 13, 2017 at 1:51 PM
To: mbrown@ecologyactioncenter.org

Dear Ecology Action Center,

I am writing to express my support for the proposed Solid Waste Plan. I was deeply concerned to learn that the McLean County landfill will reach capacity in 2018 and that one of the primary causes is lack of recycling on the part of construction companies. For-profit companies should not be able to dispose of high quantities of waste in landfills if those materials are recyclable. Additionally, I am a homeowner who lives next to a rental property and feel that landlords have a responsibility to include recycling as a complimentary amenity. One of the former tenants who lived next to me once asked if she could share my recycling bin, as she was on a fixed income and could not afford one on her own.

Not only is recycling good for the environment, but it saves citizens money by keeping unnecessary waste out of landfills. Please let me know if there is any further action I can take in support of the 20-year Solid Waste Plan.

With best wishes,

Solid Waste Plan - Public Comment

Zachary Braun [redacted] Mon, Nov 13, 2017 at 1:41 PM
To: mbrown@ecologyactioncenter.org

Mr. Brown,

I wanted to reach out to express my support for the EAC's solid waste plan. I reviewed the stipulations of the plan, and believe that it is a thorough, well-thought out plan of action to address the long overdue problem of the lack of off-campus recycling among other issues.

I met with you last year with some colleagues to discuss potential solutions for this issue, and am thrilled that some of what we discussed was put into the plan.

It is alarming that not only has our landfill reached capacity so soon, but that there is so much opposition to proactive steps toward reducing waste in our county. Please feel free to use any of my comments when presenting your case to the County Board, and good luck!

Thank you for all you do to protect our environment,

Solid waste plan public comment

Barb Maxwell [redacted] Tue, Nov 14, 2017 at 8:29 AM
To: "mbrown@ecologyactioncenter.org" <mbrown@ecologyactioncenter.org>

Hi, Michael,

It is so easy to be a fan and supporter of the EAC yet sit back and just watch the organization work. It is amazing and continues to improve our community year in and year out. But I feel maybe this is a good time to actually put my support in writing.

At this time you have presented a 20-year plan to address our recycling situation. Although the general public is supporting the local programs well, I believe, there are still big issues left unaddressed in our county. For some reason the construction companies aren't required to recycle. The tons of materials dumped in our landfills just contributes to the problem we are now facing. And why apartment owners don't make it convenient to renters to recycle is beyond me. I have talked to many renters who are very frustrated with this situation. And commercial businesses need to have ways to make it more convenient for them, too, to recycle whatever they can. These are HUGE gaps in the system that need to be filled. We will soon be paying for someone else to take our waste materials. That money will be coming from our tax dollars. Can't imagine anyone really wants that. We need even more education and outreach to help educate ALL citizens (thus covering landlords and business owners) to prevent everything from food waste, construction materials, business wastes (a lot of this being hazardous waste, no doubt) from ending up in our landfills. This must be a full community commitment. It will take time to figure out how to tackle these issues. Probably wise to tackle one at a time but these changes need to implemented sooner than later.

Together we can save tax money, and become more environmentally friendly. It just makes sense to make this a better, healthier county to live in for all.

Thank you for all you do.

I support the twenty-year waste management plan

Rejmer, Maya [redacted] Mon, Nov 13, 2017 at 11:39 AM
To: Michael Brown <mbrown@ecologyactioncenter.org>

Hello,
My name is Maya Rejmer and I am the Secretary of Sustainability for Illinois State University's Student Government Association. I am also the Chairwoman of the Student Sustainability Committee which helps fund sustainability initiatives brought forward by faculty and students.
I am emailing you to vocalize my support for the twenty-year waste management plan. As an off-campus student at Illinois State University, I am dealing with the waste problems that McLean county and my realtor are refusing to address. A lot of friends, including my roommates have a lot of recycling that we don't know what to do with. There are designated recycling areas around town, however most of us aren't aware of them and don't have transportation that can get us there. What ends up happening is a lot of recycling is discarded in the trash. In general, I think the community of McLean County needs a comprehensive waste management plan that is created with long term investments in mind.
Waste management and sustainability are long term priorities that benefit the environment, the community, and the city. Avoiding these waste management problems is purely political and it is hurting students, community members, and marginalized groups. This plan that the Ecology Action Center has released is the first step to really addressing the problems. If there is anything I can do as a student, or anything that the Student Sustainability Committee can do, please let me know.
Best,
Maya Rejmer

Dear Mr Brown,

Thank you for collecting the public's comments on this very important issue. I truly appreciate the time and energy the Ecology Action Center has spent researching the issue of solid waste in our community.

I would like to express my unequivocal support for the 20 year solid waste action plan. As a resident of McLean County, I understand there is a critical need to improve our waste management. The solid waste action plan addresses this issue and proposes common sense solutions to our current problem of the impending closure of the McLean County landfill. It is my hope that McLean County, the Town of Normal, and the City of Bloomington approve the proposed plan and take the measures needed to ensure we all work together to limit the expense of shipping our waste after March 2018.

Thank you,

Sharon Chung

I would like to express my support for the 2017 twenty-year waste management plan. As a McLean County resident, I understand that there is a desperate need to improve upon our current waste management. The plan creates positive solutions for our stagnating recycling rates, and reality of the imminent closure of the McLean County Landfill. We need everyone to do their part to limit the expenses of shipping our waste after March 2018, and this plan achieves that end.

Sincerely,
Scott Weber

To: mbrown@ecologyactioncenter.org

Mr. Brown,

I strongly support the Ecology Action Center's proposed 20-Year Waste Management Plan for Bloomington/Normal and McLean County. It will improve our local environment and make Bloomington/Normal a more attractive location for businesses and families.

I have been disturbed by seeing reusable materials being carried off to the landfill. Recycling and composting make good economic and ecological sense.

Susan Mohr [redacted] Tue, Nov 14, 2017 at 5:36 PM
To: "mbrown@ecologyactioncenter.org" <mbrown@ecologyactioncenter.org>

Mr. Brown,

Thank you for your work on the 20-Year Waste Management Plan for McLean County. As a Bloomington resident, I'm embarrassed to admit that I was unaware of the impending closure of the McLean County Landfill. Given that reality, I fully support the 20-Year Waste Management Plan. In particular, I endorse the suggestions to improve recycling rates and implement recycling ordinances for apartment dwellings. I look forward to the opportunity to utilize a comprehensive food scrap/composting program. I am appalled by the lack of ordinances regarding the disposal of C&D waste and agree that we should pursue C&D recycling. I appreciate the concrete steps, as well as the phased approach outlined in this plan.

Thank you for educating us. My family will strive for greater participation in these efforts and we'll look for ways to be part of the community education effort to achieve these goals.

Sincerely,

Susan Mohr

20 year solid waste management plan - public comment

sheiser810@aol.com [redacted] Wed, Nov 15, 2017 at 9:23 AM
To: mbrown@ecologyactioncenter.org

To: Michael Brown, Ecology Action Center,
As McLean County (Bloomington) residents, we are aware that the McLean County landfill will have reached capacity in 2018. This is a time of crisis - or - a time of opportunity.
We support the 20 year waste management plan developed this year.
We welcome new provisions for residents of apartment buildings to participate in recycling of household refuse.
We were unaware that construction companies were not already participating in recycling of construction refuse, and welcome this component of the plan.
We are concerned about the added costs of sending landfill waste to Pontiac and feel that the proposed plan will set us on a more economically responsible course for managing solid waste
Please keep us informed as the process unfolds and let us know dates for hearings before the County Board.

Sincerely,
Rick and Susan Heiser

solid waste plan public comment

Emily Eaton [redacted] Thu, Nov 16, 2017 at 3:53 PM
To: mbrown@ecologyactioncenter.org

Hi Michael,

My name is Emily Eaton and I am a Bloomington resident (512 East Grove St, 61701). I was pleased to see that the proposed plan acknowledges the difficulties of recycling for multi-family homes. I live in a four-unit building where we are (luckily) provided with curbside recycling pick-up. However, we share a single recycling bin for four households, and pick-up occurs only once every two weeks (whereas trash pick-up is weekly). The usually fills up in a few days after pick-up. When it gets full, residents begin to throw their recyclable materials into the trash (we have four trash bins that never fill up).

I'm very supportive of expanding curbside recycling services to more multi-family homes, and I'd also like to see the frequency of curbside recycling services match the frequency of trash pick-up!

Another suggestion would be to somehow incentivize building-wide compost programs for multi-family buildings. Maybe there could be a small property tax break for landlords who coordinate compost programs for their residents to participate in.

Thanks for your work,

Emily

solid waste plan public comment

Jeremy Hayes [redacted] Fri, Nov 17, 2017 at 8:07 AM
To: mbrown@ecologyactioncenter.org

Dear Mr. Brown:

I have reviewed the proposed *Twenty-Year Materials Recovery and Resource Conservation Plan for McLean County, City of Bloomington, and Town of Normal.* I am writing to express my support for the strategies provided in this plan.

In reading the plan, it is clear that the planning process has allowed for a wide range of perspectives to be taken into account. That is critical in building broad support for the actions proposed by the plan.

I want to specifically applaud the plan's authors for highlighting the need to close a huge gap in the community's recycling efforts—multi-family properties. Strong leadership and assertive, coordinated action by the municipal governments is needed to bring convenient recycling service to this huge and important chunk of Bloomington-Normal's population. It should be just as easy for residents of apartments to recycle as it is for those who live in single-family homes. Assistance from the EAC to identify dense routes and combining waste and recycling service seems to be an especially promising approach to this problem.

Thank you to all the stakeholders who participated in this important planning process. I strongly support this plan and implementation of the strategies it outlines.

Sincerely,

Jeremy Hayes

Solid waste plan public comment

Aleda Diggins [redacted] Sat, Nov 18, 2017 at 7:38 PM
To: Michael Brown <mbrown@ecologyactioncenter.org>

Dear Mr. Brown,

I am very much in favor of the 2017 20-year Waste Management Plan as outlined by the Ecology Action Center. Our community cannot afford to ignore its responsibility to thoughtfully plan for intentional waste reduction and responsible disposal. The care taken in formulating the thorough proposal is evident in its gradual implementation and well-researched detail. I feel comfortable that the best interests of our regional environment and local quality of life will be well-served if this plan is adopted. The addition of specialized personnel is also quite defensible and worthwhile in accomplishing new recycling and waste disposal goals for the 21st century. I appreciate all the time and effort expended to research and write such a thoughtful and reasonable proposal. Only through deliberate planning such as this 2017 Waste Management Plan can our community's citizens avoid the "tyranny" of unanticipated disposal costs and the damaging, irresponsible environmental pollution that predictably results from illegal, surreptitious independent dumping of waste items included in this proposal such as hazardous waste, electronics and building materials. The way I see it, we can back an intelligent plan and get our money's worth out of positive waste disposal solutions, or we can ignore the impending landfill capacity limit and lose this opportunity to arrange for and stretch future landfill space. There is no *good* reason to pass up the opportunity for strategic environmental success offered by this 20-year Waste Management Plan which captures value for our community through expanding our recycling options.

If I can be of further help in advocating adoption of EAC's wise plan on this matter to other parties during the public comment process please do let me know how.

Sincerely,

Aleda Diggins

Solid Waste Plan Public Comment

Wesley Ward [redacted] Tue, Nov 21, 2017 at 7:43 AM
To: Michael Brown <mbrown@ecologyactioncenter.org>

Mr. Brown,
I would like to make public comment regarding the proposed solid waste plan for McLean County.

We have significant problems with our current waste management system:

- **The McLean County Landfill will close in March of 2018 because it will have reached its capacity**. We will lose hosting fees from taking other counties' waste due to the closure, and have to pay to ship our waste to Pontiac.
- Our **recycling rates stagnated** between 35% and 37% from 2006 to 2015.
- **Construction companies fail to recycle**, contributing to the largest portion of our landfill's composition.
- **Apartment dwellers lack access to recycling** options due to a lack of transportation and convenience, leading to significant waste production inside the town and city.

The new solid waste plan addresses this concerns systematically with proposals that the community can support:

- A voluntary program or mandate-by-ordinance for multi-family housing (apartment/townhouse) recycling. Many people who are living in multi-family housing units have experienced curb-side recycling and benefitted from EAC education programs regarding recycling. Extending recycling to these individuals is a needed step forward.
- A new program to address a deficiency in commercial recycling.
- An ordinance in Bloomington and Normal requiring all construction and demolition materials to be recycled.
- Addresses needs in food waste, household hazardous materials, and furthering outreach, education and technical assistance.
- The plan calls for these changes slowly and incrementally so not to be burdensome.

It is a well-thought-out plan, and I am happy to endorse it. I encourage the McLean County Board to accept this plan as written and completely.

Sincerely,

Wesley B. Ward

Memo

To: McLean County Board Land Use Committee and the McLean County Board as a whole
From: Bob Broad (306 W. Virginia Ave. in Normal, IL)
Date: December 7, 2017
Re: Proposed Twenty-Year Solid Waste Management Plan for McLean County

What impresses me most about the plan is the broadly inclusive process through which it was developed. The solid waste coordinator's team made tremendous efforts not only to listen to, but also to act on, the concerns and needs of many different constituencies and interest groups in the county, including businesses, landlords (like me), tenants, waste haulers, government staff, and regular citizens of the county. As a result of its incorporation of multiple perspectives, the report can validly claim to represent the goals and interests of the people of the county as a whole.

The plan clearly and carefully lays out our current situation (landfill ready to close, recycling rates still too low, etc.) and then offers six key, common-sense strategies to help the County thrive both economically and environmentally.

Wherever possible, the plan favors voluntary strategies. As responsible citizens and leaders, however, we should not shy away from requiring people to do the right thing if that is the best thing for the county. Speed limits take away my "freedom" to drive 100 miles per hour, but I enthusiastically support speed limits because they save lives and reduce the burning of fossil fuels. As a property owner, I welcome ordinances that will structure and support more recycling among my tenants. It is the right and responsible thing to do, so let's do it.

I applaud the 20-year solid waste management plan for stepping up to meet the clear need to look further into the future than just five years. This is a superb planning document, and I look forward to the County Board members fulfilling their responsibilities to their constituents by boldly embracing, supporting, and carrying out the plan.

To: **Michael Brown – Executive Director of the Ecology Action Center**
From: **Chris Coulter – Vice President of Area Disposal Service, Inc.**
Date: **December 7, 2017**
Subject: **Public comment concerning the new McLean County Solid Waste Management Plan**

1) Public Comment
    a. Chris Coulter – Vice President of Area Disposal Service, affiliate of Peoria Disposal Co.
    b. Area's corporate office is located at 4700 N. Sterling Avenue in Peoria, Illinois
    c. I'm the fourth generation to be involved in the ownership/management of the firm
    d. Coulter Family has owned the PDC/Area companies for 90 years
    e. Area has provided waste collection/disposal services to McLean County for over 25 yrs.
    f. Area operates a waste hauling division at 512 E. Hamilton in Bloomington
        i. Over 20 employees work out of this location
        ii. Currently provide waste and recycling collection services to McLean County households and businesses from this location
            1. Municipalities under contract include:
                a. Danvers
                b. Downs
                c. Gridley
                d. Hudson
                e. LeRoy
                f. Towanda
        iii. Own and operate 2 landfills that accept waste for disposal from McLean County households and residents
            1. Clinton Landfill – 27 miles – 39M cubic yards of disposal capacity
            2. Indian Creek Landfill – 29 miles – 33M cubic yards of disposal capacity
            3. McLean County Landfill – 700,000 cubic yards of disposal capacity
            4. Clinton and Indian Creek can handle the disposal needs for McLean County during the next 20 year planning period
    g. Member of one of the Focus Groups involved with developing this new plan
    h. Robust stakeholder involvement
        i. Business (McLean County Chamber, Henson, Republic, Area)
        ii. Government (McLean County, Bloomington, Regional Planning Commission)
        iii. Schools (ISU, Illinois Wesleyan)
    i. Area supports the approval of the proposed 20 year plan
    j. In particular, we support the language that can be found on page 20 which states:
        i. **The establishment of additional waste transfer stations could have multiple economic benefits including increased competition; therefore likely more beneficial waste disposal rates or the possibility of new host agreements providing host fees as a new revenue source.**
    k. Inclusion of this language in the new plan is critical for us and other interested waste/recycling industry participants as it would allow for the development of another McLean County waste transfer station subject to a local siting approval under Criterion 8 of Section 39.2 of the Illinois Environmental Protection Act, which states the following:
        i. **If the facility is to be located in a county where the county has adopted a solid waste management plan, the facility is consistent with the plan.**

Michael Brown <mbrown@ecologyactioncenter.org>

materials recovery & resource management plan

Lucille Eckrich <[redacted]> Fri, Dec 8, 2017 at 9:23 AM
To: mbrown@ecologyactioncenter.org

I am writing to add my voice to the public comments being gathered on McLean County's materials recovery & resource management plan. While I haven't read the proposed plan in full (I would be happy to do so if you send me a link to it), I am moved to write this letter by the article in today's *Pantagraph* (12/8/17, p. A3). I fully support all improvements in McLean County's and Bloomington-Normal's collective efforts to reduce, reuse, and recycle.

As a middle school student in the 1970s, I was involved in the first recycling program ever on Long Island, NY. Every Saturday I got to ride on the back of a flat bed truck to pick up recyclables throughout our community or to wear goggles and smash glass in huge barrel drums or to stack and pack cardboard boxes and paper for shipment to paper processing plants, It was good fun to get dirty with peers and an inter-generational group of people who cared about the conditions of the environment that we bequeath to the next generation and depend upon for our very survival.

It is heartening to see how far the US has come since then, as municipalities and as a society, to recycle. But it is also sobering to see how far we have yet to go and how much more we could be doing. My spouse is from Germany where, land being at a premium, nearly EVERYTHING is by law recycled, including not just paper, glass, cans, and plastic but also ALL compost and ALL construction and demolition waste. It is not rare to see laborers--well paid in Germany due to a much more serious and just social contract--taking a building down by hand and separating all parts to be recycled. And that's only on the rare occasions when demolition is deemed better than renovating, renewing, or re-purposing a building--some of which are 100s and 100s of years old! Our butcher friend tells us that selling animal waste for biofuel is as, if not more, valuable in his business than is the animal meat he processes. Friends of ours invested with two other families in a wind turbine about 25 years ago already. They are part of a publicly-motivated and lucrative by-back commitment to renewable energy that has moved the country to around 40% of its energy today being from renewable resources. While Germany still uses too much coal, they are working to lower that while also decommissioning all nuclear power plants in the country, a decision they made after the nuclear power catastrophe in Japan.

In short, collective commitment--through our elected officials, tax dollars, volunteering, and public investment (the last being something that will be immeasurably more possible if and when we achieve monetary reform)--is essential for our and any society to reduce our human waste and carbon footprints and to leave our country and world better than we found them for the next generation. That is the commitment every young girl scout or boy scout learns and lives, and that is what we should be doing in McLean County. I strongly urge the McLean County Board to pass the strongest land use and re-cycling programs possible. Then I urge Board members to learn about and support monetary reform at local, regional, and federal levels (the latter being the most fundamental of all) so that public interests--rather than the private interests of the 1%, the plutocracy--can finally under-gird and inform our commerce and public policy.

Thanks!
Lucille Eckrich

Michael Brown <mbrown@ecologyactioncenter.org>

solid waste plan public comment

H Brandt [redacted] Sun, Dec 10, 2017 at 10:18 PM
To: Michael Brown <mbrown@ecologyactioncenter.org>

Hello Michael Brown,

I have read the Twenty-Year Plan and am in favor of meeting its goals. It is well thought out, reasonable and realistic.

Walking neighborhood streets I notice household goods put on the curb for waste pick up, things that could be reused. I mentioned this to a ReStore person and he agreed there were things that went to the landfill that could be reused but people put them on the curb rather than contact the ReStore for pickup.

The Solid Waste Plan should include a way to encourage people to conveniently contact organizations like the ReStore for pick-up instead of putting household items such as tables, chairs, cabinets, and shelves on the curb as waste. Diverting such items could also provide an opportunity for a non-profit repair business to employ out-of-work, retired or disabled persons.

I lived for many years in a community similar in size to Bloomington/Normal. Our recycle and garbage pickup has been on a bi-weekly basis. No problems have been encountered. The McLean Twenty-Year Plan could consider adopting such a schedule for single-family residences as a way to decrease environmental impact (pollution from trucks) and reduce financial costs.

Public Comment on Solid Waste Management Plandated 12-12-17

Robert [redacted] Tue, Dec 12, 2017 at 1:36 PM
To: Michael Brown <mbrown@ecologyactioncenter.org>
Cc: cnelaw1@aol.com, Laurie Wollrab <lwollrab@gmail.com>, rscritchlow@outlook.com, wendtfarm@gmail.com, jacobdavidbeard@yahoo.com, adfocus@gmail.com, doncavallini@hotmail.com, Mark Peterson <mpeterson@normal.org>, Pamela Reece <preece@normal.org>, Mayor Chris Koos <ckoos@normal.org>, srasmussen@cityhblm.org, trenner@cityblm.org, Jim Karch <jkarch@cityblm.org>

As a retired Bloomington Alderman who served on the Ecology Action Center Policy Committee representing Henson Disposal & Recycling to help prepare the Solid Waste Management Plan, I would like to explain the reasoning for supporting the Solid Waste Management Plan. As Bob Broad said at the Land Use Committee of the County Board sponsored meeting on 12-7-17, it is a kindergarten-level understanding of "freedom" to oppose government ordinances just because they limit freedom. Sometimes we do need ordinances to steer the county the direction it needs to go. "That is what leaders do, that's what communities need to do and that's what we need to do." Without laws, regulations and ordinances there is chaos.

As background information, Henson Disposal & Recycling is the only LEEDS authroized recycling center in the State of Illinois outside of the nine recycling operations in the Chicago area. In each of those Chicago area recycling operations there is a recycling ordinance in the respective community. One of the criticisms of a C & D Recycling Ordinance beyond its limiting freedom is that it simply benefits only Henson Disposal & Recycling. That turns out to not be true because by EPA regulations a recycle center must recycle a minimum of 75% of all waste material it receives, and the EPA is vigilant in monitoring that this regulation is followed. Therefore, the 75% or more that is recycled is taken to other local businesses like Behr Iron or Midwest Fiber for reuse, not to the local landfill. Another section in all nine C & D Recycle Ordinances in the Chicago area states that anyone doing demolition is allowed to single source recycle directly from the demolition site rather that taking waste material to a recycle center.

Possible opposition to the option of an ordinance would likely come from businesses, landlords and those who simply oppose regulations in general. One of the main businesses which would logically oppose an ordinance diverting C & D waste from going directly to a landfill would be the landfill owners. Howerver, at the meeting Chis Coulter, a fourth generation owner of Area Disposal which owns two nearby landfills, spoke strongly in favor of the Solid Waste Management Plan which contains language regarding the option at the full discretion of the municipality to consider supporting or not supporting a C & D Ordinance.

One of the misconceptions is that it is more expensive to recycle than it is to simply take waste materials to the local landfill. First, the local landfill will be closing in the next few months, which means any waste delivered to the transfer station will need to be transported to another landfill at least 25 miles away. This will logically increase the price at some point in the future. Second, the gate rate to recycle locally is less than it is currently is at the local landfill even before transportation costs are included in the future. Gas emmisions will be reduced by delivery to the local recycle center as opposed to the local transfer station where trucking the waste at least 25 miles will be necessary in the near future.

If the C & D recycling goals can be achieved from education of the advantages of recycling waste materials versus sending the waste materials to a landfill and the lessor gates rate fee for recycling versus landfill gate rate, then the following could be achieved:

1. Increase in recycling in McLean County.

2. Reduce gas emmisions by not trucking waste materials to landfills at least 25 miles away.
3. Provide lower gate rate fee to those disposing of waste material versus local transfer station gate rate fee.
4. Allow single source recycling from demolition sites.
5. Support from fourth generation landfill owner of two nearby landfills for the entire Solid Waste Management Plan, which includes the option to consider ordinances.

If recycling for C & D were to be mandated through a C & D ordinance, then a significant additional benefit could be a negotiated fee from the recycling to replace or even increase the income to McLean County over the current host fee from the landfill. This host fee will be eliminated with the closing of the local landfill. What is important to keep in mind is that the Solid Waste Management Plan DOES NOT propose mandating of any ordinance, but it merely notes this as an option for municipalities to consider.

Solid waste plan public comment

Given Harper [redacted] Mon, Dec 18, 2017 at 8:44 AM
To: Michael Brown <mbrown@ecologyactioncenter.org>

18 December 2017

Dear Mr. Brown,

We wish to express our strong support for the 2017 twenty-year McLean County solid waste management plan proposed by the EAC. The plan's goals of reducing the amount of waste generated and increasing the county recycling rate have both environmental and cost-saving benefits, especially in light of the fact that the only landfill in the county will soon close. Thank you for crafting a plan that will help reduce consumption of natural resources and save tax dollars in disposing of waste.

Sincerely,

R Given and Jean Harper

Proceedings of the County Board of McLean County, Illinois

January 16, 2018

Subject to approval at February 19, 2018 County Board Meeting

January 16, 2018

The McLean County Board met on Tuesday January 16, 2018 at 9: 06 am in Room 400 of Government Center, 115 East Washington Street, Bloomington, Illinois. Chairman McIntyre led the invocation followed by the Pledge Allegiance and the Roll Call.

The Following Members answered to roll call:

Members, William Caisley, Chuck Erickson, George Gordon, Mark Johnson, Randall Martin, Catherine Metsker, Scott Murphy, Erik Rankin, Carlo Robustelli, Susan Schafer, Ryan Scritchlow, Paul Segobiano, David Selzer, James Soeldner, George Wendt,(remotely) Laurie Wollrab, Josh Barnett , Jacob Beard and Chairman John McIntyre.

(19 Members Present)

Member Wendt had approval to attend and participate remotely

Member Cavallini was absent.

APPEARANCES BY MEMBERS OF THE PUBLIC

3 Members of the public spoke

1. Sharon Hellman-spoke supporting the recycling plan on the Agenda, urged the Board to approve in its original form (refer to audio)
2. Elizabeth Johnston-spoke supporting the recycling plan on the Agenda, and also urged the Board to approve the plan in its original form. (refer to audio)
3. David Parker-spoke supporting the recycling plan on the Agenda, and urged the Board to approve the plan in its original form. (refer to audio)

CONSENT AGENDA

Chairman McIntyre indicated reference to a transfer ordinance on p. 35 and asked if there were any objections? There being none, the motion passed unanimously to approve the consent.

6 (G) (other resolutions...)

World War 1 Proclamation: Chairman McIntyre presented and read the Proclamation declaring April 2018 as the month for recognition and honoring those who served in WW1.

STANDING COMMITTEES:

Vice Chair Jim Soeldner presented the 2 items of action.

7A1a Soeldner/Selzer moved the County Board approve a Request for Approval of Memorandum of Understanding for Economic Development Consulting Services. This motion passed unanimously.

Comments before the vote was passed; both by Members Segobiano and Erickson regarding the work gone into the Memorandum of Understanding for the EDC Consulting Services. By working together and being persistent, they were able to bring this MOU to the Board; understanding this is for one year at which time it can be addressed again. (refer to audio)

Member Selzer: commented he appreciated the MOU

Member Soeldner: Stated he wanted to make it clear that this MO isn't a reflection on their work; which he felt had been misreported. "I think they've done a great job."

Member Wollrab: Had a couple of technical questions, regarding page 74, performance measures. She had a question on the "bi-monthly" wording and asked for clarification.

Chairman McIntyre: indicated that it was the opinion of the Chair that this terminology is considered "every other month".

The next question by Member Wollrab was on the 3rd bullet-point, and asked "how do we expect the EDC to separate out our money with the other monies" and asked for clarification.

Bill Wasson, County Administrator: he replied that ultimately this would be on a percentage (%) basis. (refer to audio)

Member Wollrab: she offered further comments regarding performance matters. (refer to audio)

Member Caisley: Offered comments regarding the "proper resolution of the relationship with the EDC" and commented on the Pantagraph article regarding "mistrust of EDC" which he indicated was not a proper description by the Pantagraph.

Chairman McIntyre agreed. (refer to audio)

Member Erickson: Commented on the performance matters, "this is kind of a let's see what they produce and give them a fair opportunity... (refer to audio)

Chairman McIntyre: Offered comments regarding looking forward to working with the EDC with communication and clarification every other month.

Member Segobiano: Agreed with many of the comments added, "but sometimes we need to extend the olive branch to others, regarding abating taxes, etc. so we need to give credit to staff and so many others as well." (refer to audio)

Member Rankin: had a question about the wording of the meetings with EDC; "can't they be moved to quarterly rather than bi-monthly?"

Member Erickson: responded to Member Rankin, I believe the report was to be more on ongoing projects... "the point of bi-monthly was to get some idea about what projects being worked on...."

Chairman McIntyre: Suggested this topic be dealt with during the Executive Committee, to which Member Rankin agreed. After comments, the vote on this motion passed unanimously.

7A1b Soeldner/Gordon, moved the County Board approve a Request for Approval of an Emergency Appropriation Ordinance Amending the Mclean County Fiscal Year 2018 Combined Annual Appropriation and Budget Ordinance General Fund 0001, County Board 0001 (VRI). 2/3 vote required. No dissenting votes. Clerk Michael shows all Members present voting in favor of the Motion. Motion carried.

JUSTICE COMMITTEE: Member Gordon, presented the following:

Members Gordon/Martin moved the County Board approve a Request for Approval of the renewal of a Contract for Consulting Services for the McLean County Criminal Justice Coordinating Council with Illinois State University. **2/3 Vote required**. No dissenting votes. Member Murphy and Rankin abstain from voting. Clerk Michael shows all but Murphy and Rankin voting in favor of the Motion. Motion carried.

FINANCE COMMITTEE: Member Selzer, no action items.

HEALTH COMMITTEE: Member Schafer, two items for action Members Schafer/Segobiano moved the County Board approve a Request for Approval of an Ordinance of the Mclean County Board Amending the 2017 Combined Appropriation and Budget Ordinance for Fund 0107. Clerk Michael shows all Members present voting in favor of the motion. Motion carried.

Members Schafer/Wollrab moved the County Board approve a Request for Approval of an Emergency Appropriation Ordinance Amending the McLean County Fiscal Year 2017 Combined Annual Appropriation and Budget Ordinance for Fund 110. **Required a 2/3 vote.** No dissenting votes. Clerk Michael shows all Members present voting in favor of the Motion. Motion carried.

LAND USE AND DEVELOPMENT COMMITTEE: Member Erickson, presented the following:

Before the vote was called, Member Segobiano offered a substitute motion to approve the original plan presented by Ecology Action Center, (EAV); seconded Member Barnett.

The County board returned to vote on the Original motion to the EAC plan. The votes was 10 yes and 8 no.

Members Erickson/Scritchlow moved the County Board approve a Request for Approval of a Twenty-Year Materials Recovery and Resource Management Plan for McLean County, Bloomington and Normal, Illinois from the Ecology Action Center.

Attachments to the Plan, Minutes of the December 7, 2017 Land Use and Development Committee Meeting and Comments on the Plan can be found with the following link (Not: document is large and may take extra time to load):
http://www.mcleancountyil.gov/Document Center/View/11276

Comments: **Member Scritchlow** thanked everyone for the time put in on this plan's conversation. He then continued with further details about the amendment under discussion for 7E1a a consideration. (refer to audio)

Comments: **Member Soeldner stated,** "I had no idea Mr. Scritchlow would be hassled or his reputation impugned....." He further commented on why he supports the amendment by Mr. Scrithlow and that many of the references to ordinances are wrong. "I believe that and so do my constituents." (refer to audio)

Comments: **Member Wollrab** re-stated what the EAC plan is about...."how we handle our human waste." She further detailed her reasons for being for the original plan. (refer to audio)

Comments: **Member Beard** offered comments on why he would be voting against Member Segobiano's substitute motion, and provided additional comments regarding his opinion on the Scritchlow Amendment. (refer to audio). "The public is not prevented from doing their own recycling." (more comments)

Comments: **Member Robustelli** commented regarding the amended original plan. "I appreciate the divergent points of view. " He then talked in more detail as to why he supports the Segobiano Substitute Motion. (refer to audio) "A lot of misinformation... we are not calling for mandatory recycling. It's just an option..... We are not implementing the plan.... We are putting the plan forward..." (refer to audio)

Comments: **Member Johnson** wanted to mention that he was on Land Use, and per the minutes, "I brought up talking about getting the right people on the bus to meet these goals. ..Mr. Robustelli was at the same meeting...my concern with this plan...words matter. ...regarding the ordinance language...you can see in the minutes...we are not leading getting the right people on the bus...my main point is, we need a plan that set us up for success; "no one is against recycling." He stated concerns about those involved in the details of the plan and that taking the language out about the ordinances benefits us in the future. (refer to audio)

Comments: **Member Rankin** briefly reviewed again the entire process of creating the plan; the 1500 hours, all the stakeholders and signatures involved 'it bothers me...that Land Use knows better." Talked about the numerous ordinances that we already have, that are good for the county. "I believe the original plan is the right thing to do." (refer to audio)

Comments: **Member Gordon** made comments reiterating a point, "decisions have to be made, government by government, issue by issue, case by case... These are options in

the plan and only if governing boards, after listening to their constituents, will decide to move forward." Gordon indicated he supports the original plan. (refer to audio)

SECOND ROUND OF COMMENTS:

Comments: **Member Segobiano** referred to the letter from Mr. Walsh from the Chamber of Commerce, sent to all County Board members and that is talked about "it's an ordinance," when in fact it is not an ordinance. (refer to audio)

Comments: **Member Beard** added "there is a disconnect between the plan and the expectations and perceptions." (refer to audio)

Comments: **Member Johnson** responded to Members Segobiano's and Rankin's comments regarding Johnson's comments about the Chamber of Commerce letter. (refer to audio)

Comments: **Member Barnett:** "I support Member Segobiano's substitute motion. . . tremendous amount of outreach with the original plan. . . because of the amount of time. . . I think it's worthy of our support. . . ." (refer to audio)

Comments: **Member Caisley:** "This item is a plan. . . it sets goals. . . . for the future of McLean County. . . .many towns/villages in the county would have the opportunity to address ordinances. . . . this does not call for the adoption of ordinances. . . . it's just one of the remedies available. . . . I favor the plan being put forward." (refer to audio)

Comments: **Member Erickson** commented regarding issue with land use minutes indicating comments that were not included in the minutes by Mr. Brown (refer to audio)

Comments: **Member Gordon** took respectful exception to Mr. Erickson's comments about Mr. Brown. "I don't believe we should be tying his hands." (refer to audio)

Comments: **Member Wendt** offered comments regarding Mr. Brown's comments at the Land Use Committee. He also stated he "would like this to be done voluntarily rather than forced to have these ordinances."

Chairman McIntyre called the question.

Chairman McIntyre instructed the Board members regarding Member Segobiano's substitute motion: "A yes vote indicates you approve of the substitute motion that will replace the original motion." The vote was: 10 yes 8 no.

Chairman McIntyre instructed Board members they now needed to vote on the original Motion. He reminded the Board that since the substitute motion had passed the original motion now contained the EPA's original plan. He stated that a vote yes was to pass the original plan the EPA brought to the Land Use Committee and not the amended plan brought to the Board today. The vote was 10 yes 8 no.

TRANSPORTATION COMMITTEE: Member Caisley, no action items to be presented

OTHER BUSINESS AND COMMUNICATION:

Member Soeldner informed all that he will convened the Rules Committee in the next few weeks and asked if Board Members have any input to please contact him.

APPROVAL OF BILLS: Chairman McIntyre presented the bills:

Member Gordon/Caisley moved the County Board approve the bills. Clerk Michael shows all Members present voting in favor of the Motion. Motion carried.

Meeting adjourned at 10:37 a.m.

STATE OF ILLINOIS)
COUNTY OF MCLEAN,) SS.
TOWN OF NORMAL)

I, Angelia Huonker, of said Town, do hereby certify that the foregoing is a true and complete copy of an original Resolution No. 5528; being a Resolution Approving the 20-Year Materials Recovery and Resource (Solid Waste) Management Plan for McLean County, Bloomington, and Normal, Illinois, which was approved at a regular meeting of said Town Council held on the 5th day of February, 2018 by an affirmative vote of the majority of all members elected to said Council, the voted having been taken by yeas and nays and entered on the record of the proceedings of said Council.

Witness my hand and seal of said Town of Normal, this 27th day of February, 2018.

(Seal)

CORPORATE TOWN OF NORMAL, ILLINOIS
1865

Town Clerk

RESOLUTION NO. 5528

A RESOLUTION APPROVING THE 20-YEAR MATERIALS RECOVERY AND RESOURCE (SOLID WASTE) MANAGEMENT PLAN FOR MCLEAN COUNTY, BLOOMINGTON, AND NORMAL, ILLINOIS

WHEREAS, the Town of Normal is a home rule unit of local government with authority to legislate in matters concerning its local government and affairs; and

WHEREAS, under the Solid Waste Planning and Recycling Act (415 ILCS 15/), each county must have an official plan for the management of solid municipal waste generated within its boundaries; and

WHEREAS, at the direction of the McLean County Solid Waste Technical Committee, the Ecology Action Center ("EAC") prepared a 20-year solid waste plan ("Plan") for McLean County, the City of Bloomington, and the Town of Normal; and

WHEREAS, on October 5, 2017, the Plan was presented to the McLean County Land Use Committee, which started a 90-day public-comment period; presentations were also made to the Bloomington City Council on October 9, 2017 and the Normal Town Council on October 16, 2017; and

WHEREAS, on December 7, 2017, the McLean County Land Use Committee held a public hearing for the Solid Waste Master Plan for McLean County; and

WHEREAS, on January 4, 2018, the 90-day public comment period ended; and

WHEREAS, on January 16, 2018, the McLean County Board approved the Plan without any modifications; and

WHEREAS, it is in the best interests of the health, safety and welfare of the citizens of Normal to approve the Plan.

NOW, THEREFORE, BE IT RESOLVED BY THE PRESIDENT AND BOARD OF TRUSTEES FOR THE TOWN OF NORMAL, ILLINOIS:

SECTION ONE: That this resolution refers to the *20-Year Materials and Resource Management Plan for McLean County, Bloomington and Normal, Illinois*, approved by the McLean County Board on January 16, 2018.

SECTION TWO: That the Town of Normal approves the *20-Year Materials and Resource Management Plan for McLean County, Bloomington and Normal, Illinois.*

SECTION THREE: That the Town Clerk is authorized and directed to retain a copy of the *20-Year Materials and Resource Management Plan for McLean County, Bloomington and Normal, Illinois* in her office for public inspection.

ADOPTED this 5th day of February, 2018.

APPROVED:

President of the Board of Trustees
of the Town of Normal, Illinois

ATTEST:

Town Clerk
(seal)

RESOLUTION NO. 2018 – 10

A RESOLUTION ADOPTING THE TWENTY-YEAR MATERIALS RECOVERY AND RESOURCE MANAGEMENT PLAN FOR MCLEAN COUNTY, BLOOMINGTON, AND NORMAL, ILLINOIS

WHEREAS, the City of Bloomington is a home rule unit of local government with authority to legislate in matters concerning its local government and affairs; and

WHEREAS, under the Solid Waste Planning and Recycling Act (415 ILCS 15/), each county must have an official plan for the management of solid municipal waste generated within its boundaries; and

WHEREAS, at the direction of the McLean County Solid Waste Technical Committee, the Ecology Action Center ("EAC") prepared the Twenty-Year Materials Recovery and Resource Management Plan for McLean County, Bloomington, and Normal Illinois ("Plan"); and

WHEREAS, on October 5, 2017, the EAC presented the Plan to the McLean County Land Use Committee, which started a 90-day public comment period, and

WHEREAS, the Plan was presented to the Bloomington City Council on October 9, 2017 and the Normal Town Council on October 16, 2017; and

WHEREAS, On December 7, 2017, the McLean County Land Use Committee held a public hearing for the Plan and

WHEREAS, on January 16, 2018, the McLean County Board approved the Plan without any modifications; and

WHEREAS, on February 5, 2017, the Town of Normal Town Council approved the Plan without any modifications; and

WHEREAS, through its comprehensive plan, the City of Bloomington has established the goal to provide more efficient and sustainable municipal solid waste management;

NOW THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF BLOOMINGTON, ILLINOIS:

That the Twenty-Year Materials and Resource Management Plan for McLean County, Bloomington and Normal, Illinois, labeled "Exhibit A," is hereby adopted.

PASSED this 25th day of February 2018.
APPROVED this 27th day of February 2018.

CITY OF BLOOMINGTON:

Tari Renner, Mayor

ATTEST:

Cherry L. Lawson, City Clerk
